DINNER FOR FIELD DAY CONTESTANTS

Speeches Reuse Enthusiasm—Medals for Physical Improvement Awarded.

Last Saturday evening the tenth annual dinner for the Field Day contestants was held. The dinner was held in the Union Dining Room. Several members of the cross-country team were present, also a few upper-classmen. The total number present was one hundred and twenty, largely consisting of freshmen. Dr. Rowe, '01, a member of the Advisory Council, presided as toastmaster. On his left Dean Burton sat at the table with the best dinners ever served at the Union, and the cigars and cigarettes had been passed around. Dr. Rowe rose for a short speech.

At the conclusion of the speeches everyone was permitted to speak about Field Day and the annual dinner for the contestants. The winning teams of the Field Day Cup presented by Samuel Cabot, '77, whose cup had not been won for the last five years, were discussed. The winning teams were those of the Sophomore and Junior classes.

When the speeches had closed the table was cleared. Dr. Rowe called upon Captain Halvorsen of the Varsity track team to be a judge of the B. E. F. cup, which he did with gratifying result.

The next speaker, President Macaulay, addressed a few words of welcome to the two larger classes. He said that although it was impossible for him to attend all the student diners during the year, he would still make it a point to attend at least one. He then went on to say that Winthrop Field Day had been the place of the former dinners and the contests of former days had been supported by athletic contests. The next point taken by President Macaulay was that fellow students in the Institute should come out for athletics more. Although athletics are given too much weight in some colleges, such is not the case here, and every fellow owed it to himself to prepare himself for future work by giving some of his time to sport. He then left the Samuel Cabot, '77, left a sort of encomium on the entire winning teams and their value to the men in years to come. The Union was again open for the evening.

The next speaker was Dean Burton. He first said that all of the Field Days that he had attended he enjoyed this one the most. He then went on to say that he hoped the students would be proud of their victory, and also that there would be more pleasant with the game that they had made and the fact that they had won.

MUCH ACTIVITY IN THE MINING DEPARTMENT

Recent Large Gifts of Ore Give Much Activity in the Mining Department.

The Mining Engineering Department has recently been presented with a ton of copper ore from the Jamaica Consolidated Mining Company, from the Rand, South Africa, mines. This ore will be placed in a bin at the Institute, and the students will have the opportunity to work on it in various capacities. The ore will be used for research purposes, as might be expected, but it is also the best possible way of getting at the real value of their product. Several tons of gold, silver and bismuth ore are also being used in the Laboratory of the Institute. This ore is used for research purposes in the study of the ores of the western United States.

B. W. Marquart, B. S., Colorado School of Mines, who is at present working for a Master's degree at the Institute, is devoting himself to a deep study of the ores of the South African area. The second group of students is that of the students who are taking their degrees at the Institute. Several of the students are working on samples of silver, gold and bismuth ores from the Colorado School of Mines, and it is thought that this work will prove valuable in the future.

East D. Dooly, B. S., R. R., who is an instructor in the Missouri School of Mines, is in connection with a group of students in the mining department who are studying the ores of the Missouri area. These students are studying the ores of the Missouri area, and it is expected that they will publish a paper on this subject in the near future.

Dr. Rowe called upon Captain Halvorsen of the Varsity track team to be a judge of the B. E. F. cup, which he did with gratifying result.

The next speaker, President Macaulay, addressed a few words of welcome to the two larger classes. He said that although it was impossible for him to attend all the student diners during the year, he would still make it a point to attend at least one. ASSISTANT MANAGERS FOR THE TECH SHOW

Competitors for the Three Positions Will Meet in Show Office Today.

Competition for assistants in the Business Department of Tech Show, 1912, opens today, Monday, November 6, and three men are to be chosen from the Freshmen and Sophomore classes to fill the vacancies now existing. All men interested in this competition are to meet Business Manager R. W. Weeks in the Show office, first floor, between 9 and 11 o'clock, and from 2:30 to 5:30, or from 9:30 to 1:30, A.M.

The positions open at present are those of the first assistant and the second assistant managers. The first point taken by President Macaulay was that there had been such a demand for students during the vacation time for mines and laborers, the skilled student even before graduation, that there was a great opportunity to make themselves useful in the field. The second point was that there would be a demand for students during the vacation time for mines and laborers, the skilled student even before graduation, that there was a great opportunity to make themselves useful in the field.

The Business Department has been working to be able to compile a list of the names of those who have already had previous experience in this work. This competition will last until the candidates are selected.

The third point taken by President Macaulay was that there had been such a demand for students during the vacation time for mines and laborers, the skilled student even before graduation, that there was a great opportunity to make themselves useful in the field.
