All communications should be addressed to the proper departments.

Subscription rates: $2.00 per year, in advance. Single copies, 6 cents.

Subscriptions within the Boston Postal District and among the United States must be accompanied by postage at the rate of one cent per copy.

Printed by Ritten, 117 Columbus Ave.

SATURDAY, DEC. 3, 1911

IN CHARGE OF MONDAY ISSUE.

The Dean made a marked compliment to the Civil Engineering Society at the meeting of the Architectural Engineering Society last Tuesday evening, when he advised the latter to follow in the footsteps of the Civil Society in the organization being the liveliest in existence at the Institute at the present time. Any of the other societies might well profit from the Civils in regard to the activity of their particular bodies. The Electrical and Mechanicals have not enough excusals to awaken interest in that form of increasing learning. The holding of excusals gives the men the best chance that they can possibly get of seeing how things are going in the outside world, and how the various mechanical and electrical corporations carry on their respective departments. The excusals broaden one's view of a remarkable extent and give the flushing touch to the education furnished by the Institute Curriculum.

With the Program Committees of the Mechanical, and particularly the Electrical Societies, will get busy and give their members a chance to visit the various plants in the vicinity of the "Hub."

CROSS-COUNTRY.

(continued from Page 1.)

Hare and Hounds' Club is conducting the race this afternoon and Coach Kanny makes out the handicap. The horses that are given as prizes are the gifts of R. H. Lorenzo, 1905, who was the holder of the record for the West Roxbury course, which was previously used for this race; F. C. Lovelace, 1905; and A. H. Hunter, 1910, both members of the cross-country team while in the Institute, and ex-Captain Harold Ellis, 1903.

ALL-AMERICA FOOTBALL.

(continued from Page 1.)

say that this man in Jim Thorpe, of Carlisle is enough; we need no adding nothing in his favor. Cawasell, of Harvard, has given a fine consistent exhibitions in the running power, so that he will be at the 1912 All-American team. Captain Dalton, of the Navy, has shown great ability in that best of all departments the year hitting, and in two years running with his sure toe, other backs who will figure strongly in many people's minds, but he is not quite up to the mark.

IMPROVED CAFETERIA SERVICE BEING PLANNED

Modern Scientific Methods to Be Installed in New Technology.

One of the more important problems on the social side of the life in any large college is the question of feeding the vast army of students. Recognizing the importance of this mammoth dining room which is to be installed in the new Technology building, we would expect a modern and up-to-date equipment combined with scientific management. The service which we now have in this line cannot be excelled anywhere in Boston, thanks to the efforts of one efficient steward, Mr. Colton. But he intends to make the new dining room surpass anything of the sort now in existence.

The cafeteria service is the best patronized part of the student "Restaurant" in the Union, so particular care will be taken in that feature of the new service. The method will probably be an improvement of the one now used in several of the "Laboratory Kitchen Lunch Rooms" in operation in this city. In these there is a wall between the kitchen and the serving-room containing niches or openings through which dishes may be passed. At Tech the opening is the name of the particular article of food served there, and a customer has no difficulty in finding what he wants. In this way a person is able to obtain meals at a price much lower than that charged at most restaurants.

If you are not familiar with the conception of the cafeteria service in the Union it is time that you got acquainted. Try it some day when you are in a hurry.

Would you like to be in Europe with Professor Emeritus Chauncey?

Three Rais! for our amateur Hockey Club Leader.

Cornell is to be the model for a large new university in Perth, the capital of Western Australia.

KOMMERS' DINNER.

(continued from Page 1.)

Mr. Harold Wouwn, W. author of "Dear Old M. L. T. and the Windings of Four Shows," has consented to be present and offer advice to those who are interested in entering competition for prizes and music for this year's Show.

Besides these men who have had experience with other Tech Shows, the managers of the various departments of the Tech Show, 1912, will all be on hand to give talks concerning their individual departments. This will be an excellent opportunity for the Freshmen to become familiar with the working plans of the Show and its relation to the Institute. They should bear in mind that the dinner is given primarily for their benefit and it is the hope of the management that the Class of 1915 will show a large representation.

Remember tonight in the Union, at 6:30 o'clock, and tickets can be obtained at the Cafe, the Show office, and from any of the men connected with the Show for the nominal price of 75 cents. Everybody come and have the time of your life.
