ALUMNI B' SKETBALL

MEN PLAY VARIETY REGULAR TEAM HAS CHANCE FOR GOOD TEST AGAINST OLD MEN.

Varsity basketball practice was held in the gymnasium Monday afternoon, and the squad was given some good, hard work. After the shooting practice the men were given a fifteen-minute scrummage with Capt. Schach as coach and referee. He is pulling a fast team into shape, but the task of picking the team is harder now than it did three weeks ago. Following the scrimmage and after a short rest the men were lined up against a number of the alumni, with Schacht of their own squad playing with the Grads to make up the game. The game was fast and hard fought throughout, with the alumni leading a triffe on account of their experience. The Tech men played well, with plenty of life and wind throughout the two periods, keeping the alumni going all the time. Schacht proved a great help to the alumni team and showed a very clever dodging and shooting ability. Schacht and Frawley did the best work for the regulars. The new men were all given a chance at first with the older men taking their places later in the game. Things were more even after the experienced men took a hand, as evidenced by the number of goals which were shot in the second period. The final score was: Varsity 16, Alumni 15.

PROMINENT EUROPEAN ARCHITECT AT TECH

Mr. H. P. Berlage of Amsterdam will lecture on December 8 in Huntington Hall.

On Friday evening, December 8th, Mr. H. P. Berlage of Amsterdam, Holland, will lecture in Huntington Hall on "The Foundation and Development of Architecture." The lecture will be supplemented by views as well as by an exhibition of Mr. Berlage's work, which can be seen on December 7, 8, and 9, in 16 Rogers.

Mr. Berlage is a very prominent European architect and is one whose work is considered among the best. He has published many books in which he sets forth his architectural principles and the end toward which he is working. As an architect he has studied the trends and has in architecture for years and has endeavored to make real progress in construction rather than imitating constantly the choicest material-briefly the choicest materials—briefly the story of their manufacture. Give them a trial and you will surely make a friend.
