THURSDAY, DEC. 7, 1911

IN CHARGE OF MONDAY ISSUE.

EDITOR—Oethtiger, M. A., 1911

Assistant Editor, Dec., 1912; Mass., 1914.

The T. C. A. has arranged to have a very good speaker at their weekly meeting on Thursday, December 7th, in the Union. Dr. Johannesen, of the University of Copenhagen, will deliver a lecture on "Heredity Segregation," which will be of great interest to all students.

DR. JOHANNSEN TALKS ON INHERITANCE

Large Audience Heats First of Series of Lectures By Danish Savant.

Last night the first of a series of Lowell Institute lectures on "The Facts and Theories of Inheritance," entitled "Primitives Conceptions of Heredity Segregation," was delivered by Dr. Johannesen, of the University of Copenhagen, in the Union. The hall was almost completely filled by students and audiences that has gathered there this year, and Dr. Johannesen delivered his subject in such a pleasing manner that he had no difficulty in holding the attention of his hearers to the end.

This lecture is the first of a series of four to be delivered during this week and next. The second one, entitled "Selection—Law of Segregation—Pure Lines," will be delivered Saturday evening, December 9th. The third, "The Unit Factor—Segregation," will be given on Wednesday evening, December 13th, and the last, entitled "New Beta Types—Acquired Characteristic," will be given on the following Saturday.

Tickets may still be had on application at office of Manager (or hall of the Carrousel) for Professor Sabine's, Dr. Rosener's and Dr. Johannesen's lectures.

MUSICAL CLUB CONCERT.

Will Play at the Masonic Temple in Roxbury.

The Mandalin and Vanga Clubs will play next Monday night at a concert given by Professor Voger in the Masonic Temple in Roxbury. This will be a regular concert and all the members are urged to be present.

It is expected that the concerts will make a good impression and that there will be a large audience.

CONCERT AT NEWTON.

The orchestra management has arranged for an important concert to be held on Thursday evening at the Newton Y. M. C. A. A very good program has been promised, and it is expected that the concerts will make a good impression.

One hundred and seven years ago today, William Barton Rogers, founder and first President of this Institute, was born.

President Rogers was born in Philadelphia, December 7, 1804. He was educated at and graduated from William and Mary's College in Virginia, and later held the Chair of Natural Philosophy at that institution. Seven years later he was called to hold a similar position at the University of Virginia. His geological survey of the State of Virginia in 1815 was the first of its kind.

The T. C. A. has arranged to have a very good speaker at their weekly meeting on Thursday, December 7th, in the Union. Dr. Johannesen, of the University of Copenhagen, will deliver a lecture on "Heredity Segregation," which will be of great interest to all students.

FRATERNITY MEN.

Besides those men in fraternities represented at the Institute there are always a considerable number of men from other colleges belonging to fraternities not represented here. These, too, have their share in the social life of the institution and the social life of the Union.

To the Editor of THE TECH:

I noticed that the new Field Day that has recently been instituted in the Union has no mention on it of the automobile, the 1914 relay team in each relay record which no one disputes. It is only fitting and proper that the team be given credit for their shaving and no better place to find than upon the banner, which will tell the story of the 1914-15 Field Day to all who enter the Union.

A Member of the Team.

Shave With a Smile

You Can't Get a Real Shave Without a Real Razor.

THE DURHAM DUPLEX

is a Real razor. It slides smoothly over the face, severing the whiskers with the correct diagonal stroke like a scythe mows grass. It leaves the skin soft and velvety—not rough and harsh as after scraping with razors which do not have this stroke.
