PRESIDENT'S REPORT.

(Continued from Page 1, Col. 3.)

...with every advantage.

Mr. Rindge Tells of Growth in Interest Elsewhere.

Yesterday afternoon Mr. Rindge, who was the keynote to the meeting today in the Union, told the Cabinet members of the Association about the success that has followed agitation for Industrial Service and teaching of English in college follows elsewhere. The movement originated at East St. in 1853, five years ago, and has had an astonishing growth until there are now forty-five men engaged at least once a week there conducting some classes of young people who would have no other opportunity to learn the language spoken by their employers. In the Carnegie Tech, Pittsburgh, the student leaders have taken up the work with astonishing interest, as among those teaching are the presidents of all the professional societies and the chairman of the Student Senate.

Very evidently there is some direction in the work that has attracted the best men of other schools, and it will be Mr. Rindge's object to make Tech men see the attraction in the Union at half past one.

At a final word he said that, without exception, the biggest engineers of the country say that their success has been due to ability to deal with men. By coming in close contact with the type while in college a man will have a great advantage.

The movement originated in Sheffield, and the chairman of the Student Senate (lenters of all the professional societies combined to give work with astonishing interest, as among those teaching are the presidents of all the professional societies and the chairman of the Student Senate.

...with every advantage.
