SWIMMING TEAM NOW DISBANDED
Non-Support and Little Interest Necessitate Cancelling Schedule.

At a meeting of the Swimming Team, held recently, it was decided that the swimming team for the year was now disbanded on account of the non-support and little interest. This fact was undoubtedly due to the inaccessibility of the practice tank, and the lack of sufficient time to pay the necessary attention. At first the prospects were most bright, for out of the many who reported there were a few who showed quality that necessitated their position on the squad. These men, Captains R. A. Leichter, G. H. Mann and G. H. Warfield deserve the highest credit for their faithfulness to practice and interest in the success of the team. They were, however, not sufficiently supported by other or new candidates to form a worthy team. It thus being impossible to represent the team as the squadron desired, it was thought best to disband the sport by a team of a desired number. It will be noted that such an excellent one as Brown, Amherst and Harvard, it was thought best to disband the sport by a team of a desired number.
