LAWYER TO PLEA FOR "CONSISTENCY"

Mr. Elbridge R. Anderson Will Speak at the T. C. A. Meeting.

The speaker Thursday noon in the Union will be a Boston lawyer, an everyday State trial lawyer, who has made a success in his profession. The T. C. A. wants a big crowd to welcome Mr. Elbridge R. Anderson and hear what he has to say about "Consistency." He explains that one can hardly expect anything judicial from a State street lawyer, and his subject is one that he should make convincing, because his career has been what the word implies. The T. C. A. wants just such a subject, and never does welcome a theological discussion at the meetings.

Mr. Anderson has been a practicing lawyer here since 1885, and has been identified with the work that accomplished the establishment of a comprehensive system of subways for the city of Boston, his position being that of the chairman of the board, or board of directors, of the Boston Elevated Railway Company, which is generally believed will be for the best interests of the community, and which became a certainty when the Boston Elevated signed the leases.

COMMUNICATION.

(We invite communications from all men in the Institute on important subjects. They may have no responsibility for their sentiments and do not agree to print any that they cannot sign."

Editor of the T. C. A."

If space permits, will you kindly allow me to defend the "Theoretically Dead" ones? These quoted words, according to Saturday's issue of THE TECH, includes all I.T.'s students who did not cast their votes relative to the formation of a Religious Fraternity. I believe that this is an insufficient basis upon which to cast their vote will be found not dead, certainly when the Boston Elevated signed the leases.

PASTEURIZATION TALK.

Milton J. Rosenau, who has been giving the lectures on this subject in the Lowell Institute, will give his next lecture this evening at 8 o'clock at Huntington Hall. This is the fifth one of the series, and the subject will be "Pasteurization." The previous ones have been well attended owing to their interest as well as their practical points. Mr. Rosenau ought to be an authority on this subject as he is Professor of Preventative Medicine and Hygiene in the Harvard Medical School.
