The Princeton football team has dropped the Navy from its schedule and will play only one Wednesday game.

INSTITUTE NAVY TO RECEIVE ADDITION

Christmas Gift From Well-Known Yachtsmen Enables
Continuation of Models.

Following within a very short time of the announcement of the success which the Detroit Fire Department's Fire Protection Association has had during the past year, with the formation of two large organizations, comes the news of the successful conclusion of a campaign for the Institute Navy for the coming year.

One of the important stipulations going into the gift is the one which requires that the money be expended in experiments on artistic designs. It is a well-known fact that there is at present very little scientific data on the construction and methods of prosecution of these most useful little craft, and anything which may be learned on the subject will be of great value.

The hull of the model will be built by students in the art studio on Connecticut Avenue, under the supervision of known hose, and then it will be tested in the basin of the Charles in the usual manner of putting the boat down and getting it into the water. In the "Froide" it will be transported by students, and the tests along scientific lines will be completed for at least another year. The first course is being given by Dr. Charles G. Weld, but his recent absence has made it impossible for him to give up work very great indeed.

This new gift has proven the value of the tests from a commercial point, and is a splendid illustration of the way in which the Institute is supplying needed scientific facts to the world of commerce.

COSMOPOLITAN CLUB TO HOLD DINNER

Affair to Be Held at Technology Club—Excellent Dinner—Good Speakers.

The Cosmopolitan Club has decided to hold a New Year's dinner at the Technology Club on December 30. This is the first dinner of the year for the club, and it is expected to be a great success. The manager of the club, Mr. Mill, is very earnest in his efforts to help carry out the plans for this entertainment, and is looking forward to it with great interest.

MINING MEETING.

Dr. Shimner to Talk on "Geology and Scenery of the Rhine." A wonderful and magnificent slide show of the scenes along the Rhine will be given by the mining engineer himself, Mr. Joseph Lindon Smith, who will give a short talk on the "Geology and Scenery of the Rhine."" The slides are a masterpiece, and will be enjoyed by all.

ART MUSEUM LECTURES.

Prof. Seaver to Speak Again At Free Sunday Docent Service. Any man who are in the city over the holidays will have a fine opportunity to enjoy some talks in the Art Museum Sunday afternoon that have been given by Prof. Seaver, for the men who are giving them have made a study of their work and are able to handle their subjects in a masterful fashion. At 2:30 o'clock, in the Mastaba Gallery, Mr. Joseph Lindon Smith will give a short talk on the "Evolution of the Rhine." At 3:00 o'clock, in the same gallery, Dr. Shimner will speak on the "The Marquis de Pastour." These lectures are free and open to the public.

COMMITTEE TO REPORT.

Last evening the Highway Committee of Cambridge voted to report to the City Council the proposal to build a bridge across the Arapahoe River. The committee on the bridge project was held to consider the possibility that the bridge work might be carried on to construct a new street, but this belief has been due to a misunderstanding, and the report is not ready.

To Observe Jupiter.

Professor William H. Pickering, 79, of Cambridge, who has recently returned from a visit to his native country, said yesterday that he is planning to build a large telescope to observe the clearings of the tropics.

The Princeton football team has dropped the Navy from its schedule and will play only one Wednesday game.
