INSTITUTE COMMITTEE WANTS NEW TECH YELLS

Constitution Ratified at Meeting

Yesterday—Discussion of Common Fund.

A meeting of the Institute Committee was held yesterday afternoon in the room behind the A. F. & A. M. Office and under the direction of the Engineering C. the Chemistry Lecture Room, G. W. Keel, the Editor-in-Chief of the Board to publish "Concerning M. J. T.," reported that the Board of Directors would meet next meeting and would start in active work at the beginning of next term.

The constitution and by-laws of the Institute Committee which have lately been prepared were read into the record the activities shall turn their profits, and which from they may draw small amounts of money at the beginning of the year for necessary expenses. At the beginning of the year the activities are greatly in need of money with which to start the year's work, and many of the activities are thought to be very active members of the Institute have thought that the profits of the activities might well be employed for the benefit of any of those that would need a loan. It was necessary that the first three took up this idea at first it would not have been possible that the others would soon follow.

It was decided that all members of the Institute Committee who are absent from the meetings or is tardy will be liable to a fine. This rule will be strictly enforced.

G. W. White was appointed custodian of the trophies. His duty is to collect framed class pictures, team pictures, society pictures, prize cups, etc. The discharge of the duties of this office is an important enough to warrant a revival of the custom.

JUNIOR PROM

The Junior Prom Committee met Monday night. No business of importance was taken up at this meeting. It was decided that the members got together. They discussed the time, place and music. The program was the subject of discussion for the rest of the meeting.

Continue to do, whether it remains partially in Boston or not.

Second, it can open its grounds to the citizens of Cambridge, especially during the summer, when these grounds are not in constant use by a large section of the student body. Third, it can give some special facilities to youthful Cambridge by way of scholarships. If the Cambridge mat- ters, through the first President scholars will be available next fall, and the number granted will be determined by the merit and meritulous applicants that present themselves.

To revert once more to Mr. Litchfield, he made me prophesy that the sentiment is remeasurable by the progress of the site problem, the issue of the campaign for increased endowment and the success of the Congress of Technology.

Even old Homer sometimes naps, and Mr. Litchfield and I have to agree that the prophesies of the future, the few that our prophesies failed to include another great success of the year, which is due to the Alumni. I mean the securing of a site and equipment for the summer school in Maine, a more important matter than most of you probably realize, and due to Eaton and that nameless one whom we have so highly honored and respected.

In brief the President said: "A few years ago I had the temerity to record the report of last year's annual meeting. I do not say that on that occasion I must have pronounced word without uncom- mercially to be considered as a prophet. This is not my profession. It has been my task. I have had the privilege of hearing the history of the Institute, as the great Congress marked the close of the old and the opening of the new epoch in the history.

"In the first place he said that the site problem would be practically solved; so it has, and if any one feels that it has not been well solved let him now stand forth or forever hold his peace. It has been solved through the co-operation of many, but no small share of the credit is due to Mr. Litchfield and to the service of Mr. Litchfield, Cambridge, who urged us to go to that city and try to get the necessary requisites for the new Institute. In plain terms, I suspect that Editor Litchfield is quite as responsible as I am for the prosperity that he put into my mouth.

"It is because so many Tech men have made good in their chosen professions that we have had so much evidence of good will from the community.

"This interesting talk was followed by a question period.

CATHOLICS TO HOLD DANCE AT SOMERSET

Probation Officer Mulready Interested in Girls at Monthly Meeting.

Last night the Catholic Club held its regular monthly meeting at 6 Hotel, at 7:30. After an excel- lent dinner, the speaker of the evening was intro- duced to the members Mr. Edwin Mul- ready, Chief Probation Officer of the courts of Massachusetts.

Mr. Mulready took this opportunity to introduce the girls to the "other side of life." He told them about the method of dealing with criminals by placing them on probation instead of immediately putting them in the pen. He also put the idea into the head of the former. The idea of the McNamaras, the men in "happier" are the ones directly responsible for all crimes. The young people are the ones who are the ones responsible for all crimes. The young people are the ones.

Mr. Mulready that many of these people could be saved in prison by placing them on probation in some locality where they would be free from bad influences. Thirty years ago a Boston philanthropist went into one of the courthouses and found a large number of people being sent to prison. He asked the judge how many of these men and boys and place them in positions where they could be given a chance to reform. The judge said that he was the starting of the probation idea. Mr. Mulready made the statement that he hoped that the fellows would help this work in any way that they could.

This interesting talk was followed by the reading of the minutes of the last meeting. The report of the dance committee was then read. The invitation for the Catholic Club dance is to be held on Monday, February 5th. The com- mittee was very fortunate in being able to secure the hall of the Hotel Somerset for this event, everyone who wishes to have invitations sent out should leave their names and addresses at the office of the magazine.
