Meeting of the Wireless Society

Mr. Ellis gives talk on inductance and explains some of the difficulties.

The monthly meeting of the Wireless Society was held last evening in room B and there were thirteen members present. After the secretary’s report, the business of the Society was taken up. Three new members were proposed for membership in the Society, and were voted in. The chairman then reported that Dr. Pender had promised to give an address on “Inductance” and this was expected very soon. It was voted to elect a board of directors to obtain volunteers who would be willing to devote one afternoon to teaching some of the members how to operate the apparatus. This would not only be good practice for the men themselves, but could be of great assistance to those who have not had the opportunity to send and receive messages.

After the business of the meeting was finished Mr. Ellis, who is a member of the Society, gave an instructive talk on “Inductance.” He showed by means of diagrams how the lines of force surround the wires and effects produced by changes of current on the lines of force. Inductance is measured by the number of lines of force the wire is enclosed in when a unit current is passed through. If the current changes rapidly, the lines of force also change. Mr. Ellis explained many points which were causing difficulty to some of the members, and an unanswered message was then sent to him for his assistance.

The chairman announced that the Society’s annual meeting will be held at their room for those members who have paid their dues and who have not received them. A new point is to be substituted in the apparatus for the old one, which is almost useless on account of poor contacts. After the examiners are over the apparatus will be hard at work making an efficient apparatus.

INDOOR MEET

“UINDERS”

The summary of points was as follows:

- 50-yard dash—First heat, Barry, 1913, first; Wilson, 1914, second; plasma, 1916, third; Thompson, 1915, fourth.
- 100-yard dash—Wilson, 1914, first; Thompson, 1915, second; plasma, 1916, third; Nye, 1914, fourth.
- 220-yard dash—Benjamin, 1912, first; Muncie, 1913, second; Thompson, 1915, third; Gooding, 1914, fourth.
- 330-yard run—Bylund, 1912, first; Nye, 1914, second; Plasma, 1916, third; Spencer, 1914, fourth.
- Mile run—Sheehy, 1913, first; Nye, 1914, second; Lee, 1914, third; Wall, 1915, fourth.
- 404-yard hurdles—Huff, 1914, first; Curtis, 1914, second; Thomas, 1915, third; Strachan, 1915, fourth.
- High jump—Dalrymple, 1912, first; 5 ft., 11 in., new indoor record; Hall, 1912, second; Town, 1915, third; and Richmond, 1914, fourth.
- Shot-put—Maclean, 1914, first; 46 lb., new indoor record; Hall, 1912, second; Town, 1914, third; and Richmond, 1914, fourth.
- Relay race “Ondors” vs. “Clinders”—Won by the “Ondors” (Freeman, Barry, Curtis, Hall, Spencer, Wilson, Thompson). Time—2 minutes 52.5 seconds, new record for distance (1446 yards) for track.
- The points for the class championship were as follows:
