HOCKEY TEAM PLAYS
AT YALE SATURDAY

First Game to Be Played in the New Yale Rink—Much Improvement.

The Technology hockey team will play its second intercollegiate game Saturday afternoon against Yale at New Haven. The team is even better than when it defeated Harvard, but it will have to do its best, however, for Yale has shown itself to be a strong team. The men already won two games from Cornell. The game will be played in Yale's new indoor rink, and will be the first game played there. This game is the only athletic event coming during the holiday week at Yale, and promises to arouse much interest.

Coach Clifford has been putting the team through a very strenuous series of practices in order to get them into the very best of condition. At yesterday's practice, three Harvard Freshmen teams, winning from both by a score of 1 to 0.

The men are getting faster every day and are passing accurately, and the forwards are very strong, but the defense is not as good as last year. Capt. Sisson is "right there" with the fast rushes, and Hurbut is keeping the fancy shots honest. Storke, Yearcance and Flett-ter have shown themselves to be clever players. Although playing "coverpoint, Storke is no mean forward, and his rushes are about as effective as any on the team.

Very few scouts are getting by Kitchon, and Hunty is stopping them whether they come high or low. Whitledge and McLeod can be found almost anywhere in the defense. The men to take the Yale trip are: Hunty, Kitchon, Hunty and Smith.

CATHOLIC CLUB DANCE.

The Catholic Club has been working hard making preparations for their dance which is to come off on Monday evening, February 5th. The committee have been very fortunate in securing the Hotel Somerset for this social event, and the members of the club have been very busy making preparation in order to make the dance a success than ever before. Poole's Orchestra has been selected from the best of the Latin-American neighbors to be present and lend their encouragement.

The speaker told first of the general relations of the country, laying great emphasis on the chances of food and drink. He advised prospective voters to our Latin-American neighbors to bear the hearing water reverence alone, and that, indeed, one must do its best to make it perfect. In the next few years, it is expected that it will serve its purpose.

Mr. Turner also gave the Miners last one that he gave the Miners last year. This year, the music of the orchestra, some of the best examples of which were in the accordion. The last dance is to be played in the University, one of the very best of condition. At yes-

POLITICAL ECONOMY
EXAMINATION PAPERS

Questions Should Aid Juniors in Preparation for Mid-Year.

Through the courtesy of Professor Jerry B. TECB THIEB is enabled to print several of the past mid-year examinations in Political Economy. The papers include those given in the examinations of 1905, 67, '08, and '10. These papers should prove of great value to those preparing for the examination, which comes from 5 to 11, Tuesday, January 16th.

30. a. What is marginal utility? Use a diagram if you wish.

31. b. What is the relation of profits to price?

32. c. What are the advantages and the disadvantages of wage-earning?

33. d. What would be the probable results of a 10 per cent increase in silver?

34. e. On what grounds is the tax imposed on foreign exchange rates?

35. f. What is the Smithian theory of money?

36. g. Define the following: (a) open shop; (b) national monopoly; (c) per capita policy.

37. h. What is meant by a dollar?

38. i. How is the rate of foreign exchange influenced?

39. j. What is the Metayer system?

40. k. What is the meaning of the following: "The national currency is the measure of price?" These questions should aid juniors in preparation for the mid-year examination.
