DR. ALEXANDER MANN

WILL SPEAK IN UNION

"The Tech Chaplain" Will Talk at Christian Association Meeting

This week's speaker at the Christian Association Thursday meeting, Dr. Alexander Mann, is a person who has always shown great interest in Technology ever since he took the office made famous the world over by his predecessor, Phillips Brooks. Years ago, at the time of the Boston fire, the old Trinity Church building was destroyed, but the Institute, offered Huntington, then called "Technological Hall," to the church, and the congregation moved into it with their new home, built by Richardson, was completed of almost across the street from Rogers.

Since that time, instead of the Boston of Trinity coming to a Tech building to talk, it has become necessary for Tech to go to Trinity. This, however, a semblance of the days before our Union was dreamed of will be remade in the Stevens dormitory over to Tech and speaks to the crowd assembled there at half past one to noon.

Do not forget that Dr. Mann has earned his title of Tech Chaplain, by his interest in the institute, his many Bachelor's Day services, his generosity and geniality, and his social ability.

NEW "L." CARS TESTED

Five Course VI Men Investigating Cambridge Subway Cars

In the new Cambridge Subway, five Course VI men, H. M. Foley, J. C. Gilbert, P. S. Freeman, P. E. Golsam, H. D. Kemp, have been testing around either for additional land on his recent trip through the world, and will explain fundamental concepts of the world, and will explain how closely the contract time required to accelerate a car to fifty miles an hour. Another equally important matter is the efficiency of the brakes.

The work will be continued popularly, and will be accompanied by wholly new lanterns and promises to be interesting.

COLLEGES GROWING

Many Institutions Find Larger Quarters Necessary

The Institute is not the only large institution of learning which is in need of larger quarters, as a careful consideration of the problem would show. For example, a large number of them are looking around either for additional land or a different location. Among those which come readily in mind are: the R. Goleman, H. D. Kempe University at Hopkins University, North Western University, and the University of Minnesota, because they were visited by the President on his recent trip through the Union.

At the University of Minnesota they decided that they are looking at about fifty acres to add to the campus already purchased, and at a large number of buildings constructed in an additional location. The work of design is on its way to the architects, and Gilbert, '78, and he has the number of other institutions men working with him in charge of the different departments of construction. This is a work that speaks volumes of praise for the architectural department of the Institute as well as for the graduate himself, for Mr. Gilbert was chosen as the best man for the place.

VICTROLA CONCERT.

The Union House Committee is planning to give another grand entertainment for the students of their new Victrola on Friday evening of this week. About 100 students of the freshman and sophomore classes are expected to come and enjoy the music that is being played. The prices of the ticket are very reasonable, and will be sold at the entrance to the hall. The committee is very busy with the arrangements and everything is being done to make the concert a success.

BABBSON WILL SPEAK TO SOCIETY OF ARTS

Tonight, at S. P. M., Roger W. Babson will deliver an illustrated lecture on "Anticipating Business Conditions by the Study of Statistics," before the Society of Arts, in Huntington Hall, to which Babson is a well-known writer on economics and his recent articles for the guidance of the many well-adapted large firms in the field have gained large professional attention. In its announcement of the lecture the society says that Mr. Babson, since his graduation from the Union, fourteen years ago, developed the greatest statistical organization in the world, and will explain fundamental business conditions which are kept track of by means of maps and other charts. In addition to his facts of present business he will show how it is possible to forecast future conditions.

The subject will be treated popularly, and will be accompanied by wholly new lanterns and promises to be interesting.

WRESTLING AT "STUTE" HAS COME TO STAY

Squad of Twenty Men Reporting Regularly for Practice at Gym.

Wrestling at the Institute has grown remarkably during the present year. The team has grown from five men to a squad of almost twenty, and more are coming all the time. Captain Smythe-Marvin has shown that he is very capable in the management of this class of sport and has developed a team such as the "Stute" has never seen before.

This will be the first regular appearance during the winter season, and the Club will probably sing "Take Me Back to Tech," accompanied by the stringed instruments.

SOPHOMORES UNBEATEN.

Freshman Series Nearby—Odds Taken by 1914 Players.

Few teams are able to boast of these records, that the Sophomore basketball team has made this season in preparation for the series of games with the freshmen, beginning February 21st. The team, composed of Comber, Tyrill, Bronson, Bryant and Price, with Henderson and Fox as substitutes, have succeeded in winning all the games that they have played. Teams with such fine records as the Harvard Normal School and the State, and with no one else Bay State team, fell by a close score; Salem and Hanover High were both defeated in fast, close games, and Andover succeeded by a score of 14-12.

Williams leads the men in number of baskets shot from the floor and has showed good, consistent playing. Tyrill, at forward, and Price at back, have brought themselves into shape and defense. Captain Comber and Bryant are to have the share of the credit now. Of these men and the substitutes it is thought that all will play in the upcoming games. Bronson and Price are sure to be favorites, although with the freshmen at present, they may show a surprise or two at the State, Will game, with Allen School. If the five successes in landing this spring concert, they will have paved a worthy path for interclass honors.

CALANDAR.

In Charge of S. H. Taylor, 1911.

White, Wednesday, February 7.

5.00—Track Practice—Gym.
6.00—Basketball Practice—Gym.
