STANLEY AUTO SHOPS
MECCA OF MECHANICALS

Trip Friday Afternoon Will Show All Stages of Auto Construction.

Friday afternoon the Mechanical Engineering Society will conduct a trip through the Stanley Automobile Company’s plant in Newton. The position of one of the largest plants that is confined wholly to the production of steam vehicles will give a great many men a chance to see things that cannot be seen in any other place in the country.

Every part of the machine is made in the factory at Newton with the exception of the castings. The construction of the flash type, is made of pressed steel and is tested up to 500 pounds pressure. One of the important parts of this machine is the direct engine to which the Stamby is the only one of any kind of driving mechanism, and therefore does away with the need of oiling the other which is common in other cars.

The party will leave the Trinity Station at 2:30, and every member of the society is expected to be present. Tickets can be procured from the officers of the society.

DR. MANN SPEAKS

The full one thousand and one are due on the Union here when Dr. Alexander Mann of Trinity Church will speak to the fellows. Dr. Mann has always shown an interest in Tech and Tech men, and preached many delirium tremens sermons to the graduating classes.

These Thursday noon meetings have proved very popular. Regular attendants nearly everybody will find this talk of Dr. Mann’s particularly interesting. The meeting will begin at 12:30, and will be over in fifty minutes to give the students time to get to the 12:50 train of cars, even if they are away during the meeting.

MR. BARSON’S LECTURE

(Continued from Page 1, Col. 1.)

section it is interesting to note that the state of this country is expected to be present. The lecture will begin at 12:30, and will be over in thirty minutes to give the students time to get to the 12:50 train of cars, even if they are away during the meeting.

Another of the things proposed to the student Committee is an all-undergraduate dinner. President Peck of the Juniors proposed this, and we believe that it is another step in the right direction. The committee appointed was the support of all loyal students.

One unfortunate result of the Institute Committee’s meeting was the choice of an Editor-in-Chief. Not that we wish to decry the capabilities of the man chosen, Prof. G. C. Heilman, but rather that it seemed advisable that a Senator be chosen for that office. It is difficult to believe that a competent Senator might not have been found.

The first choice has been made, and we trust that all co-operation possible will be afforded the editor, in order that a truly representative book may be published.

AN OUNCE OF PREVENTION.

The Adolph S. Lundin scientific system of Turkish Baths is the only natural and hygienic way to prevent that coo-cooing cold. Established nearly twenty years ago under the Tremont Theatre. Special rates to a part of the city at five dollars.

It would not be wise to follow the example of the Battalion officer who says: “You can’t beat the winter climate when she has given him the wrong number, “As You Were.”

THE SMOOTHEST TOBACCO

A good friend is the friendly couch— who comes and brings a tin of Velvet and helps you in the nick of time.

Velvet is a smoothest tobacco—in three sizes up to five times.

Takes two years of smoking to take out all harshness and “bite”. Make the intemperate and guilty ‘smooth.”

That’s why Velvet is a helpful snuff— never brittle—just delivers the maximum of pipe pleasure—that we’re all after. At all dealers.

SPEAKING & BERRICK

THEMEGA OF MECHANICALS

UNICORN CLUB LOSES

The B. A. seven was not quite as good as the Grande Nine that last night and lost by a score of 5 to 4. The play was good in places, but nearly all of the players had trouble of bad playing. Canterbury, the B. A. a goal tender, was not up to the standard, and let several easy ones into the net.

Richie of the Grand Mere team was the star of the game. Almost three of the Intercollegials, and Gardner, an old Harvard player, appeared for the first time in the Unicorn ranks, each playing part of the game.

Hicks, N. H. Foster, Richie and Buscher played the best long goals were made by Richio, J. Leslie, Foster, Tiahard, Hicks and Buscher. Two 20 minute halves were played.
