SHOW PLANS ARE IN EXCELLENT CONDITION

Probable Performances in MAlden Northampton, and Providence, as well as Boston.

The management of the Show has almost completed the preliminary work on the production, and the time is rapidly approaching when they will call upon the undergraduates as a whole to do their best work. All of the departments are in fine condition and the progress is very well balanced to date. Coach Ranger has expressed himself as very pleased with the way that the management has done, and was particularly pleased with the musical notices which he obtained last Saturday at the meeting of the administration.

The stage department is about ready to issue the call for the candidates for the musical notices and chorus, and it will be a personal call from the men who have any ability whatever to sing or act. A list of candidates will be on the board in the manifolder's hands, so that if you will hurry you will get to the show.

RECORD HIGH JUMPING

Best Men of the Country Entered for Meet in Mechanics Bldg.

One of the events at the B. A. Meet in which a record is almost sure to go is, even though it may not be very spectacular, i.e., the high jump, for college men like such a thing. First class men in the event have been seen.

Of those now entered, it is evident that the winner may be picked from the three men, Dalrymple of the frosh, and Burdick and Henry of the soph, who will be wearing the Unicorn and Burdick, the Pennsy man. Previously, over six feet on several occasions this winter and was picked to break the record at the New York meet a few weeks ago. Burdick and Dalrymple tied for first place at the A. A. Meet in the St. Louis, but from past work the Technology jumper should have a little advantage indoors. Dalrymple has been doing very consistent work in the Gym during the cold months, and recently broke the Gym record with a clearance of 5 feet, 11 inches.

RHODE ISLAND ALUMNI

Tech Club to Gather for Dinner Tonight in Providence.

The Technology Club of Rhode Island is holding an informal supper in the Hotel Blackstone in Providence, next Friday evening, which will be a couple of fine talks by two of the members.

Elsier H. Bossel, 1890, will talk for a few minutes on "The New People's Savings Bank Building," and Newcom D. Bonnin, 1892, will discuss the subject on bank "Planting and Cement." Both of these men are graduates from the Institute and they are successful architects in the Rhode Island city. It is rather with pride that this show should choose a savings bank and the other a cement book, but they both probably deal with the national variety at a rule.

ANGELO-AMERICAN BALL FOR COSMOPOLITANS

New Form of National Evening Planned for Saturday, February 24.

The Cosmopolitan Club plans to inaugurate an entirely new kind of National Evening for Saturday, the 24th of this month. On that evening there will be held an Anglo-American ball at the Hotel Tufts, for which hosts present novel features.

To select events are the decorations of their national costumes, and as many of them have served in the armies of their respective countries, the numbers of colors of various and splendid uniforms will be worn and the ladies' gowns to form an impressive spectacle.

The list of guests includes many famous persons. Among those who expect to be present on the occasion are the British Consul, the Rector of Trinity Church, and many others.

The committee has arranged a call for the candidates to be made to the (Continued on Page 2.)

BOOKS DISTRIBUTED.

Finance Committee Gives Uniform System to Activities.

At the meeting of the Finance Committee last night the books were given out for the use of the various activities. They consist of a cash book and sender bound in one volume, having an index also. These books were gotten out by the committee and paid for by Mr. Howard L. Comfort, '98, one of the graduate members of the committee.

The committee appointed to consider the books of the Class of 1914 reported that books had been found which contain no postings, and that this is a very serious lack in any book accounts for last year. The Class of 1914, the Class of 1915, the Athletic Association, the Portfolio and the Technical Ring are the only activities that have books in them.

DR. MANN ON ESSENCE OF RELIGION

Rector of Trinity Church Spoke to Christian Association Gathering.

Yesterday noon Dr. Alexander Mann spoke to the Christian Association members in the Union most instructively on the subject, "The Contribution that Religion Ought to Make in One's Life." There was a large gathering and the talk received careful attention and seemed to make much impression on the men listening.

DR. MANN, before concluding his talk today, said that it was about the most informal religious meeting, if it could be called such at all, that he had ever attended, and that he had been inclined to think that we would get more out of the meetings if we were something more of a religious service.

As the man again of the traditional friendship that has reigned between the Institute and Trinity Church ever since Technology opened its doors to the congregation when one burned down and religion was injected into Tech in those two or three years since before this man, Trinity will remember the helpfulness of Technology's hospitality, and hopes that Trinity will return the favor when it is able.

TRIP TO NEWTON TODAY.

M. E. Society to Inspect Works of Stanley Automobile Co.

Today is the day set for the Mechanical Engineering Society trip to the factory of the Stanley Motor Car Company in Newton. It is expected that thirty or forty men will avail themselves of this opportunity of seeing the plant and of studying methods of construction. The men will meet at the Trinity Station and will take the 2:50 train for Newton, where they will be met by the Stanley Representative, Manager Warren, who will accompany them to the factory.

This is situated on the banks of the Charles, about seven minutes' walk from the station, and is composed of one concrete building and one wooden one. At the plant the Society will be met by the sales agent, who will conduct the tour. The trip should prove very instructive, not only in the methods of automobile construction, but also in the usefulness of labor-saving machinery, for the Stanley plant is superbly equipped with cash and wooden ones.

At the plant the Society will be met by the sales agent, who will conduct the tour. The trip should prove very instructive, not only in the methods of automobile construction, but also in the usefulness of labor-saving machinery, for the Stanley plant is superbly equipped with cash and wooden ones.

Members of the Society who have not yet bought their tickets can do so by applying early today to one of the members.

DARTMOUTH RELAY.

Harry Hillman, the Dartmouth track coach, has picked the team that will represent the Green at the B. A. meet on Saturday, February 24, running against Technology and made up for the following: C. M. Smith, Capt., Dolan, Haywood, O'Connell, Conger and Gardner. The majority of the special and individual events have not been finally decided, but the team will not be as strong as it has been in the past, but of the fact that there is a very strong collection of old track men who will make up the outdoor track team this coming season.

FRESHMAN TRACK TEAM TO MEET LOWELL HIGH

Lower Classmen are Strong in Nearly Every Event and are Picked for Easy Victory.

As first-year men cannot compete in the B. A. meet, the management has arranged a meet for them on Saturday with the strong Lowell High team at Lowell, and yesterday Coach Knapp picked a number of those who will make the trip.

Hann and O'Brien were chosen for the dashes, while Barry should place in those races as well as in the 300-yard distance. Curtis and Thomas are entered in the hurdles, Curtis being especially speedy over the tall timbered and also in the 600-yard run. In the 400-yard run they have Howes, Hall and Howes, with chances about even for any of them to win the meet.

(Continued on Page 2.)

FURTHER FROM PLANS.

A Man will be in Union Every Day With Pledge Books.

The arrangements for the Junior Prom are rapidly maturing and all those who have not yet signed up as soon as possible, as the number of tickets to be had is limited. From now on an attempt to be made in the Union every day with pledge books, so that you will have a chance to sign up before it is too late. Only about seventy-five men have signed their intention of getting tickets up to the present time.

The preliminary dance orders will be out in about two weeks, and can be obtained from any of the members of the committee.

The poster competition will close Saturday, February 24, by which date any body artistically inclined will be able to make a very interesting first-class nature. A ticket will be given to the man (and his girl) who draws the winning poster, with the promise of finding his job. Only a few men are out for this task, so there is plenty of chance for anybody in college, and all who wish to do so will see C. A. in the Union at noon on Thursday and get all particulars.

CALENDAR.

In Charge of S. H. Taylor, '11.

FRIDAY, February 9.

2.00-M. E. Society—Trinity Station-Trip to Newton.

4.15-Glee Club—Union.

6.00-Baseball Practice—Gym.
