Harvey S. Benson, President
N. E. I. A. A.

**Harvey S. Benson Made**

*Meet to Be Held at Springfield—Plan to Have Cross-Country Run.*

At a meeting of the New England Intercollegiate Athletic Association, held at the Hotel Lenox Saturday morning, Harvey S. Benson, '12, was elected President, and Max L. Waterman, manager of the track team, was elected Treasurer. The other officers of the Association for the coming year are: C. R. Crawford, Providence, Vice-President; A. D. Robison, New York, Secretary. This is probably the only time that any college has had two officers in the Association.

The annual Spring meet is to be held this year at the Field, Springfield, Mass. This decision was reached owing to the success of last year's meet, which was held at that place. The dates set for the meet are the seventeenth and eighteenth of May, which are the Friday and Saturday before our final examinations.

The Tech Relay Team has been invited to participate, and has landslideumped the Tech team on the whole.

Dartmouth has decided to remain in the Association for another year at least. The Mass. Aggies applied for admission to the league but the application is on the table. The performances of the Agricultural College athletes will be watched during the year according to the Association.

The New England Intercollegiate Athletic Association will hold an interesting meeting. Freshmen's, and they won all three events. The men's meet was the decision to form a National Track Association, already in existence, and formed the Technology Club of New Hampshire with thirty-five active charter members and a spirit of enthusiasm and energy that augured well for the future of the club and the club which it will be able to give to the Institute in every line of work.

The officers who were elected at the meeting were as follows: President, N. E. I. A. A. Johnstone; Vice-President, Norwin S. Pean, '34, and Secretary-Treasurer, Andrew Pluber, Jr., '96. Everybody was interested in the idea of "The Tech button," and they have all ordered theirs. Newton D. Benjamin, '99, was the first one issued. They have not been on hand long enough to let the members realize the value of the Tech button, but the members and the officers are looking forward to the day when they will have the button in their pockets and be able to show it to all their friends.

The Tech relay team was beaten by the Dartmouth team in very slow time, 9.3, however, which is the lowest time ever set on this track. The Tech team is not likely to win any more meets this season. The Tech team has not had enough practice to make it capable of winning.

**Bursar on "Buttons."**

Men Seconding Tech Buttons Are Asked to Order at Once.

Bursar has taken full charge of the new all-Technology button, both from the manufacturing and selling point of view, and he has entered into a most active and enthusiastic campaign to sell the button. He asks that every man in the Institute order a button, and that all of the Tech team order at least one button. The button is being sold at a low price of $1.50 each, and he has handed out the Tech button to the Tech team and the members are already planning to "do things."
