RELAY CHANCES NOT BAD AFTER ALL

Times in Trials Showed That Men Could Have Run Faster Than They Did.

The prospects now in view for the Harvard, Penn and Princeton men at the Eastern Relays on the 22nd are very poor for the one-mile team, but the two-mile team is a fast one, and it is hoped that they will carry home a victory to the "Brave." The failure of the mile team to win Saturday evening and the slow time that the team made only is but one of two reasons, either that the two men on the team were nervous or that the team is a slower one than last year's. This latter seems very improbable as the times made in the Trials were faster than usual, so that it must have been that the two men not used to running in a meet of so much importance lost their heads and did not live up to their reputations. The chances are mentioned, however, and it is hoped that if the men run as good as their times in trials showed that they could, Harvard will have a chance to land the meet.

The two-mile team is probably the fastest that the Institute has ever had in the field, and it looks as if they will carry everything before them. They will run at the Columbia games held in New York next Saturday evening, and should come next Tuesday to enjoy this talk from a number of members of the Schenectady "Section of the A. I. E. E."

OPEN MEETING.
Mechanics Invite Everybody to Hear Talk on Patents.

The Mechanics League, Schenectady Section, plans to hold an open meeting next Tuesday, the 20th of February, at 4 o'clock, in the lobby of Mr. William W. Dodge, tell "How a Man Can Protect His Inventions." Mr. St. Paul, who is a prominent patent attorney of Washington, D.C., was induced to speak to the Mechanics because of the interest shown by the Mechanics in the subject last week.

The meeting will be held at the Institute, and notices of it will be sent to all members of the Mechanics League.

MILTON HAYMAN WINNER OF POSTER COMPETITION.

Local Advertising and Poster Experts Pick Design With Red and Yellow Girl.

The Publicity Department of the Institute have announced the result of the poster competition for "Castles in Spain," all the work of the prize for Milton H. Hayman. He then showed clearly how Franklin and Messrs. Hill, Cheney and Tenney's recent paper, "Electricity," and gave a very interesting talk that was discussed in a detailed manner by a number of members of the Schenectady "Section of the A. I. E. E."

BASKETBALL TEAM TO PLAY BROWN NEXT WEEK.

A Fast Game Expected Although Both Teams are Not In Good Form.

Wednesday night the Victory team will line up against the Brown five at the gym. The team from Providence has been performing unusually well in its games only by small scores, and they were played on the home floor. They defeated the Rhode Island College team by the score of 35-10, while the latter put it all over the Tech team to the tune of 45 to 17.

The huge team is getting in some hard work lately and the contest will, at least, be close. Morley, who was out of the game for some time with a broken nose, is back again, and the team will be greatly strengthened by his presence at center. It is the only home game for the team and Captain Sclar expects to see everybody out to help them give Brown a tight game.

When seen last night, Mersery Freedman said: "I think that the team has an even chance and if they play a good, hard game ought to be able to come out on top."

SOPHOMORES, ATTENTION.

Technique Electoral Committee Election This Week.

The Technique Electoral Committee recommends to be elected this week.

Ballots are to be distributed to the members of the Sophomore class to-day, probably at the Physics lecture, after which the ballots may be secured.

Twenty-five men are to be picked for the committee, and only the first twenty-five names marked on the ballots will be counted. No man's vote will be counted unless his date, which is a dollar and a half a year, have been paid. The committee in charge will be notified if any one is not printed on the ballot it may be written in the vacant space at the bottom.

The committee in charge consists of Samuel H. Taylor, Neville C. Thompson and John C. Morse.

MUSICAL CLUBS!!

This Week's Rehearsals Are Important.

Owing to the fact that the Glee Society has had to be canceled for the last two stated events, the men are urged not to miss the rehearsal on Friday of the present week, for it will be the last before one of the great concerts of the year, "Good Citizenship".

The orchestra will rehearse this week at 4:15 O'clock in the Union, and both the orchestra and glee club on Friday, the former in 25 Lowell, the latter in the University guests, at the time. Nine million dollars is the estimated cost.

Two bad that Munch fell, but better luck next time.

LIEUT.-GOVERNOR ON "GOOD CITIZENSHIP"

Robert Luce Will Speak in the Union to the T. C. A. On Thursday.

This week's speaker at the Thursday Night Forum of the Christian Association will be the Lieutenant-Governor of Massachusetts, Robert Luce. He plans to speak on a subject that is most opportune, "Good Citizenship," coming, as the talk will, between Lincoln's and Washington's birthdays.

Mr. Luce is a New Englander, as he was born in Maine and attended Harvard, where he received his Master's degree in 1882, and received his Master's degree the next year. After leaving college he was actively interested for several years in newspaper work, and was a member of the editorial staff of the Boston Globe during the years from 1894 to 1896. His work in journalism, however, did not end when he left that paper and became the first publisher and editor of "The Press Clipping Bureau."

But the Lieutenant-Governor is best known as a statesman, a statesman which he has distinguished himself for unusual nerve in championing unpopular causes. While he was running for his present office last fall he was frequently campaigning for "No License." For ten years he was a member of the Massachusetts House of Representatives and became an authority on election laws.

Last year he spoke in the banquet in Symphony Hall at the time of the big concert, and his speech that showed how interested he was in Technology, and the Association is glad to have obtained such a man to speak in the Union.

BIBLE CLASS MEETING.
T. C. A. Class to Discuss Old Teachings.

Some day this week the T. C. A. Bible class will meet in the Union for their weekly council and it is expected that the discussion will be one upon the subject of how the Bible is to be taken under consideration is that of the difference between the religion of the Jewish rabbi of the time of Jesus; and the effect of their teachings upon the people. A poster will be posted in the Union before the meeting in order that every one may know the time of the meeting.
