BATTLESHIP BUILDERS
TO BE VISITED AGAIN

Electric Will Make Second Visit to Fore River Tomorrow.

The Electrical Engineering Society will take another trip to the plant of the Fore River Shipbuilding Company at Quincy Point tomorrow afternoon. The party will meet in Lowell, Mass., near the library of the department, at 4:15 o'clock, and go from there to the Stoddard Street, where they will take the 1:15 train to Quincy. This second trip was made necessary by the fact that the number that can go at one time is limited to thirty. As only twelve signed up yesterday, this limit will probably not be reached, and those desiring to visit the shipyard tomorrow will greatly oblige the secretary by signing up as soon as possible.

The Fore River Shipbuilding Company is one of the largest concerns of its kind in this country, and is equipped with the most improved mechanical and electrical appliances for building modern war vessels and liners. A visit to their yards should prove very interesting to the members of the society who have not already gone.

COMMUNICATION.

Communications From All Men Invited.

We invite communications from all men in the Institute on important subjects. The party will meet in Lowell, Mass., near the library of the department, at 4:15 o'clock, and go from there to the Stoddard Street, where they will take the 1:15 train to Quincy. This second trip was made necessary by the fact that the number that can go at one time is limited to thirty. As only twelve signed up yesterday, this limit will probably not be reached, and those desiring to visit the shipyard tomorrow will greatly oblige the secretary by signing up as soon as possible.

To the Editor of THE TECH:

Dear Sir:-

Far be it from one so humble as I to write such illustrious communications as those signed by "A. K. Icker." For these I have received undeserved praise. Kindly publish this whet

Very truly yours,

A. McEicher.

UNION SCANDAL.

The absolute non-cooperation of the Faculty with regard to the thefts which have been occurring in the Union during the last few weeks has been the subject of much adverse criticism among the students. Last Saturday three hats were taken from the living room at the Union and the owners were accordingly put to much trouble and inconvenience. During the present week several overcoats have disappeared through these mysterious channels.

What can we understand about it? Right or wrong! It is dishonestly discreted on ourselves individually, and on the school as a whole.

We apparently are not to receive the assistance of the Faculty, in putting out this evil; it remains with us to eradicate this move from our center. This is the best way for us to go about it?

The only logical course seems to be for the undergraduate body to get together and form a vigilance committee to find the thieves, and once found, let us teach them such a lesson that the name of the Institute will never again be besmeared by such actions.

COURTESY.

The invitation of the Harvard Engineering Society to our men to attend the meeting last night at their rooms is an example which might readily be followed by several of our own societies. The invitation of men from other colleges not only helps to promote harmonic feeling between the respective schools, but it proves of benefit because we cannot in this way learn how things are managed at other places.

A friend further suggests the inviting of more outsiders to our meetings, the expense would be very little more, and the increase of interest in the school around the city.

It's too bad that we can't have a Gymnasium and a swimming team. The expenses needed to run these teams are practically nothing and they certainly help a great deal.

The spring competition for the du Pont cup will open pretty soon, and it will be a good thing to warn some of the Freshmen to take a chance at it this spring, and then they will know who they are to demand of them. No doubt if they will be all ready to start ahead and win it.
