THE BLESSING AND THE CURSE OF HABIT

Dr. James A. Francis Will Be the Speaker at Christian Association Meeting.

This week the speaker, Dr. James A. Francis, at the Thursday noon meeting, will be the Christian. He said on a man who has not been in Boston very long, but who has already earned a reputation as one of the ablest and most popular preachers in the city. Dr. Francis' home has always been in Nova Scotia.

His choice of subject is one that will be recognized as one often discussed by everyone, "The Blessing and the Curse of Habit." Regular Meeting of Wireless Club.

H. B. Richmond gave interesting talk on receiving outfits.

Last Friday afternoon the Wireless Club held its first meeting of the second term in the Eng. B. The following men were elected to the membership in the society: A. Saltzberg, 1912; W. C. Lovell, 1912; G. H. Stevenson, 1914, and J. S. Howins.

After the meeting had been called to order and the minutes of the last meeting read and accepted, H. A. Abt introduced Mr. Richmond, the speaker of the afternoon. He gave an excellent description of the different types of receiving outfits which are in most general use at the present time.

He started his talk with a description of the simplest apparatus which can be used to receive and pointed out the disadvantages in the efficiency of such an outfit. Then he described the improvements which have been produced to help remedy these defects. The circuits using a long-coupled tuning coil are probably the most efficient.

The system which has been in use on the majority of our warships and was arranged by Mr. Pickard, a prominent wireless engineer, is perhaps (Continued to Page 2.)

SHIPYARD VISITED.

Electricals Made Trip Monday to Fore River Works.

Sixteen members of the Electrical Engineering Society made a trip to the Fore River Shipbuilding Company's yard Monday noon. The party started from the E. E. Building at 11 and reached the plant at 3:15.

The Clyde, which conducted the party, showed them through the forging depart- ment first. Here they saw a rudimentary forge and the dies for the various parts used in the manufacture of the various parts used in the manufacture of the engines. Then they went into a small direct-connected engine, which was in the process of assembly and erecting of turbines is an important phase of the work of a shipyard, and the men who work at this trade are among the most highly skilled in the shipyard.

At the next stop, the party visited the turbine generator, where they saw the pump that supplies the heating water and the turbines that drive it.

Shieyboard visited.

The trip is very short. You'll believe in hospitality with Fatima Cigarettes.
