The Tech Musical Clubs will give a concert Tuesday at the Tabernacle Church in West Newton. Following the concert there is to be a dance.

The evening's entertainment is to consist of popular song hits, plantation songs and three vocal numbers. The program is printed below:

1. Song of the Cannibals—Glee Club.
4. Vocal Quartet—Selected.
5. Song of the Boatmen on the Volga—Mandolin Club.
10. A Stein Song—Bullard, '97.

CASTLES IN SPAIN

Publicity Department Busy—Principals Rehearsing.

If the other participants in the Tech Show prove to be as good as the principals appear to be, "Castles In Spain" will no doubt be a decided success.

The Publicity Department is conducting extensive advertising in Northampton South Hadley and Amherst in anticipation of the performance, to be given at the Academy of Music in Northampton, on April 27th. Announcements bearing the picture of Dolly Carter, the heroine of last year's show, "Promised French," will be sent to all the students in Smith, Mount Holyoke and Amherst Colleges. The poster designed by M. E. Hayman, Holyoke and Amherst Colleges. The poster is being delayed because there are several men more yet to be submitted. It is in the case the not the case, for, although a complete knowledge of the principles of mathematics is necessary, and the engineer must be well grounded in the field of engineering, it is constant widening, and a successful engineer must have, in addition to a strict technical training, a knowledge of business, law, the drawing up of contracts, and the raising of corporations.

The common idea of the student in an engineering school is that he must be a specialist. But it is not the case, for, although a complete knowledge of the principles of mathematics is necessary, and the engineer must be well grounded in the field of engineering, it is constant widening, and a successful engineer must have, in addition to a strict technical training, a knowledge of business, law, the drawing up of contracts, and the raising of corporations.

In conclusion, he said, "since an engineer must be a constructor and administrator, and act as an expert in legal cases, he must be to handle men, know something of law, and be a businessman, in addition, of course, to having a sound technical training."

PRON POSTERS

Considerable interest has been shown by the students in the Prom Poster Competition, and there have been a large number already received. A decision on the merits of being delayed because there are several more yet to be submitted. It is in the case the not the case, for, although a complete knowledge of the principles of mathematics is necessary, and the engineer must be well grounded in the field of engineering, it is constant widening, and a successful engineer must have, in addition to a strict technical training, a knowledge of business, law, the drawing up of contracts, and the raising of corporations.

In conclusion, he said, "since an engineer must be a constructor and administrator, and act as an expert in legal cases, he must be to handle men, know something of law, and be a businessman, in addition, of course, to having a sound technical training."

ANNOUNCEMENT

A meeting of the 1912 Technological College's Electrical Engineering Society was held on Thursday, the 14th, at 4 o'clock. The officers for which nominations were to be made are: Chairman, John Taylor; Secretary, Dr. Francis; Treasurer, David Farley. Each of these officers must be a member of the class. In addition to these officers a governing committee is to be elected. This committee must consist of three members, one of which is to be a Sophomore.

Nominations are to be handed in at the time stated above and must be signed by ten names.

All sent for the Clerk: If you are feeling any symptoms of "feeling down," you had better see Dr. White (or the Dean).
