RELAY TEAMS HAVE CLOSED SEASON

Men of Both Squads Do Fine Individually and Show Good Material Left.

In reviewing the past Relay season it is unfortunate that the results are not more satisfactory to them and us, but, considering the fact that both teams were bothered by unhealthy colds, it may be safe to say that more auspicious conditions would have resulted in a more successful season, for the teams were by no means slow, there having been several men who bettered the indoor track records at the Gym.

The first practice in November brought out many men, among whom were the few that were left from teams of the preceding year, Thompson, 13, and Guey, 14, forming the nucleus of the one-mile squad, and Mareane, 12; Germaine, 12; and Ryntud, 12, on the two-mile, while Eddie Bolton showed fine speed as did the two Freckums, Hanz, and Harry. The first race was held with the Dartmouth one-mile team at 4.30 o'clock on February 30, where Hanson, Boulton, Munch and Guey ran for Technology in the order named. There were five races close throughout, the first two men finishing a small lead. An accident occurred, however, during the last lay and Guey was forced to drop his man.

Two weeks after the defeat by Dartmouth both quarts journeyed to New York and entered the championship relay races held at Columbia University. The team of Boulton, Munch and Guey ran for Technology in the order named, while the other squad of two, with the exception of Boulton was the usual one. Here in these races the (Continued on Page 3.)

POSTER COMPETITION.

Prize Poster Declared Open--Dance Orders Out March 25.

At a meeting of the Prom Committee yesterday afternoon the prize poster was decided upon by the members of the committee and made for its reproduction. The successful competitor is A. C. North, who has designed a very attractive and significant poster of three colors. It will be put on sale as soon as it can be made for its reproduction. The first call for practice in November brought out many men, among whom were the few that were left from teams of the preceding year, Thompson, 13, and Guey, 14, forming the nucleus of the one-mile squad, and Mareane, 12; Germaine, 12; and Ryntud, 12, on the two-mile, while Eddie Bolton showed fine speed as did the two Freckums, Hanz, and Harry. The first race was held with the Dartmouth one-mile team at 4.30 o'clock, where Hanson, Boulton, Munch and Guey ran for Technology in the order named. There were five races close throughout, the first two men finishing a small lead. An accident occurred, however, during the last lay and Guey was forced to drop his man.

Two weeks after the defeat by Dartmouth both quartets journeyed to New York and entered the championship relay races held at Columbia University. The team of Boulton, Munch and Guey ran for Technology in the order named, while the other squad of two, with the exception of Boulton was the usual one. HUNT. HALL; STUDENT CELEBRATION: 4:00 P.M.

MONSTER MASS MEETING IN HUNT HALL AT 4 P.M.

President Maclaruin to Speak at Official Demonstration of Student Appreciation.

President Maclaruin will speak this afternoon in Huntington Hall, at 4 o'clock, at the big student mass meeting which has resulted in a more successful season, for the teams were by no means slow, there having been several men who bettered the indoor track records at the Gym.

There are no men in the Institute who were not surprised, and pleased, when they received the call by the President of the Institute, Richard C. Macaulay, '13, and Bolton showed fine speed as did the two Freckums, Hanz, and Harry. The first race was held with the Dartmouth one-mile team at 4.30 o'clock, where Hanson, Boulton, Munch and Guey ran for Technology in the order named. There were five races close throughout, the first two men finishing a small lead. An accident occurred, however, during the last lay and Guey was forced to drop his man.

FAST SOPHOMORE TEAM MAKES CLEAN SWEEP

Brilliant Playing, Supported by Nice Team Work. Brings Every Game.

Last Saturday night the Sophomore basketball team finished one of the most successful seasons in the history of basketball at the Institute. The team played a strong schedule of high games and came out victorious in all of them.

On Friday, November 17, the following men reported for the first time: T. P. Comber, G. M. Fox, H. R. Braxton, C. Bryant, W. H. Price and F. Hitch. The last four of the Number, Henderman, Henderman and Tifford played together on the Freshman team last year. Although only a few men came out for the team, they stuck it to us with a will, and the result that a temporary team was turned out.

Of the team's captains, was the star player of the aggregation, and ran the line in fine shape. He was losing last on the floor, but he had a good eye for the baskets and his shooting was in the right part of the game. His shooting has always proved a success in the gym, and his shooting has been first-class all the year.

Tifford, who played the other forward position with Comber, scored more baskets than any other man on the team. At center, Henderman has been a good eye for the baskets and his shooting has been first-class all the year.

Tifford, who played the other forward position with Comber, scored more baskets than any other man on the team. At center, Henderman has been a good eye for the baskets and his shooting has been first-class all the year.

Dr. O. P. Gifford Delivered Fine Talk in Union.

Yesterday, Dr. O. P. Gifford spoke in the Union on the subject, "Health and Waste." He started his talk in regaling the meeting with the miracles of feeding the 5,000, and emphasized in his talk the necessity of keeping up the community's health. He emphasized the fact that it was not time to waste property or time, but the most of the most people were inclined to do this. He was a visitor, a man who did this not until the visibility and the health of the entire community. The most of the most people never are inclined to do this, but the man who does is he who is ready for an opportunity when it comes.

He mentioned several things that can be done now, and which are not wasted, but used as quickly as possible. He emphasized the fact that the most of the most people never are inclined to do this, but the man who does is he who is ready for an opportunity when it comes.
