GOLF CLUB MEETING.

All Men Interested Should Attend Meeting This Noon.

The most important meeting that has yet been held by the Golf Club will take place today at 1 o'clock, in St. Regis, and it is hoped that all of the men who have signed or countersigned the club, and those who are interested, will be present, for, upon the action of this meeting will depend the future of the club.

The several reports on links, tournaments, players, and the like will be given, and the general outlook, discussed.

President Howlett has stated particularly that every one who is interested in golf may come to this meeting and urge them to do so.

MECHANICALS' DINNER.

Continued from Page 1.

T. Rogers, 1915, of the Technical University of Delft, Holland, was the last evening laid great stress to the necessity of having the men read and study the life of Melville as the best type of the man who can handle great engineering problems.

Mr. Moletrio was then introduced and he gave the men a demonstration of the requirements for, and the advantages of, membership in the A. S. M. E. He said that a man must have a degree, a good character, and the price of admission to become a junior member after graduation.

The Tech membership in the society was smaller than in many other engineering schools, and he emphasized the fact that it would be well for them to get up to the place where they belong in this ranking because of the small cost and many advantages of belonging to this society branch.

He said that the best example of the old was shown in the way the men helped each other when they were up against a difficult problem.

Rogers, the Old Institute. A. S. M. E., told of some of the things he has accomplished twenty-five years ago. He showed how thoroughly the old men regarded Rogers as the greatest, and he said that these who are interested should put every means at their disposal to help the men today.

They took great pains to show by their work the importance of loyalty to their college.

A discussion was held on the advantages of, membership in the A. S. M. E. The president, Mr. Moletrio, emphasized the fact that it would be well for them to get up to the place where they belong in this ranking.

The Tech membership in the society was smaller than in many other engineering schools.
