Mr. Brush of Boston Elevated to Be Principal Speaker—Ideas

The Electrical Engineering Society will hold its annual dinner on Thursday, April 4th, in the Union. This will be the last meeting of the society before Junior week, and the special efforts that are being made to make it a success should bring out a large crowd. A fine dinner will be served for half a dollar.

The committee in charge has not, as yet, received all the names of the guests for the meeting, and any suggestions will be very welcome to them. They are arranging for many surprises, and some of the features will be very unique.

The principal speaker will be Mr. M. C. Brush, second vice-president of the Boston Elevated. His varied experience in the management of several railroad companies will make him an interesting man to hear. His subject has not as yet been announced. Besides Mr. Brush there will be several other good speakers.

In the former dinners singing and chaff has always been prominent, and doubtless will not be omitted on this occasion. The committee will consider any new or favorite songs which any member wishes to have a place. Whichever shall be chosen the subject, "What is the Use?" for his talk Mr. Stockdale has chosen the subject, "What is the Use?"

A special meeting of the Institute Committee convened yesterday afternoon at 1:45 o'clock, in the Union. The committee appointed to investigate the Music Clubs, the committee reorganized as follows: That the Institute Committee should recommend to, and strongly advise the Musi- cal Club, in order that in any event the two students who in the past have managed the two groups be united. That the Institute Committee should advise the Orchestra to accept such invitations to play at the Spring concert, and that they not demand complimentary tickets for their patrons, nor ask for any financial reward for their services.

After some discussion as to whether the members of the Orchestra be entertained, sundry refreshments were provided for the members of the Music Committee who were present. The committee will advise the Orchestra to accept such invitations to play at the Spring concert, and that they may not demand complimentary tickets for their patrons, nor ask for any financial reward for their services.

The committee on the Undergraduate dining room that as the plan for having such a dinner is not long enough, it be postponed until next year. The appointment of L. S. Walsh, 1913, as chairman of the Dining Room Committee, was ratified by the Institute Committee. A committee was appointed to determine the advisability of having the elections of officers of society. It was also the motion that the president be made chairman of the In- stitution Committee ratified by the Institute Committee.

HARD PRACTICE RUN.

Cross-Country Squad Covers Muddy Course in Good Time.

Yesterday's run between Highland Common and the Platts was a hard one. As it was the last trip over the course before Saturday's race, all the runners would be in shape and in good condition. The weather was cold, and the men were forced to run through sticky mud all the way with the exception of the last mile and a half on the roads. The condition of the course was worse along that part which leads through the fields just before the pig pen. Here it was quite soft, and the runners would have been forced to run all the way. The pig pen road was nothing but muddy. The meetings of old times, the descent of the hill so slippery that many of the men, running here at full speed, would have been forced to run all the way. The order in which the men finished was quite interesting as yesterday's run seems to have had its effect on the outcome of the next race.
