COMMUNICATION.

(We invite communications from all men

in the fortnight on important

We take no responsibility for their senti-

ments and do not agree to print any that

may come in, whether they are signed or

Dear Sir:-

The "Well Washer," whose letter appeared

in Wednesday's TECH, ought to be undeceived of the danger

which the T. C. A. is arranging for Friday, April 5. In the first place,

let me state that it is not an "Annu
transport": It is not in any sense

The affair is primarily a meeting for all Tech men who are in

seven I talked to one of Ron I ser-

vice; the dinner is secondary, and is

planned merely because it is easier

for students to come at 6.30 and stay

after dinner to hear a few addresses

than to come back at 8 to a more

formal meeting, which practically

breaks up the entire evening.

It did not occur to these in charge to

late that the date chosen is

Good Friday. This date was decided upon because it was one of the only

two when President Macaulay could

speak for us; he is an extremely

honest man and we were glad to adapt our

plans to suit his convenience. I should not have planned par- 

don a dinner on Good Friday, while

for personal'y I can see no possible objec-
tional to such an observance of the day,

I have the highest respect for the

views of any who disagree with me.

I can only say that we have no inten-
tion of urging any who cannot con-

siderably so do so to attend the din-

ner if they care to come in after-wards

bear the addresses will be more

warmly welcomed.

As for the meeting, which, as I have

said, is the object of the affair, Chris-

rians cannot observe the annu-

versary of the day when Christ died

by discussing Social Service,—making

plans to help the men and women

whom He died to save,—then it is

for the Christian Church to

dose its doors and give way to other

organizations which will do this great

work. It is because the Church is "on

its job" that the Technology Christian

Association plans to spend part of

Good Friday finding out how we can

help, and that the pastor of a Chris-

tian Church in the city of Boston

plans to tell us what the Church is

doing.

As to the superstition which formed

the bulk of the communication under

discussion, that does not need our at-

ention. I cannot believe that any

Tech man, "in these withholding days,"

would give any serious thought to such

ideas.

Respectfully,

L. R. Talbot,
Secretary, T. C. A.

WISDOM.

The decision of the members of the Institute Committee that it would be

inadvisable to hold the All-Technology dinner in its amended form is about

the wisest thing that could have been done under the circumstances. The

fact that the plans of the proposed dinner had been so utterly changed from

what they originally proposed, has been viewed with dissatisfaction by the

majority of the undergraduates; and, on this account, their support

would have undoubtedly been lacking when the time for the banquet arrived.

Then, again, with all the Institute lea-

in the room the air looked so thinly

the question arises whether the fel-

low men who had either the time or

financial backing to support the

idea.

We would suggest that next year's

responsible Committee should not

be the largest thing ever

and run a genuine undergradu-

ate dinner early in the school year.

There is no reason why the article

should not be the largest thing ever

be their work, and end by becom-

one of our most popular an-

functions.
