THE TECH

Harvard, Yale and Penn have started Squash Tennis Clubs, and there is a chance for an Intercollegiate tournament. This should be a form of winter exercise that Tech men could take up with advantage.

Harvard always gets more men out for the Freshman crew than for the Varsity, though there were more than fifty out for the latter this year. At the end of last week this squad was cut to four boats, and will finally be cut to only two before the class races in May.

Baseball at Boston College will be dropped this year at least, because of the lack of a field to play upon. This has caused a lot of disappointment among the undergraduates because the prospects for the team this year were exceptionally bright.

The new Pilgrim Athletic Association which will have its headquarters in the Arena, will be a big success judging from the great amount of interest shown by the membership and those who have already come in. The club will support all branches of sport.

The inter-fraternity baseball teams at Brown have been organized. The games start at six in the morning, and the players are sometimes seen running around the bases in their pajamas.

As an inducement for the larger use of the gymnasium, the students at the Washington University have been given the use of the lookouts free for the last year. Only a deposit on the key is required.

Johnny Hayes, who won the Marathon in the last Olympics, has entered the International Marathon to be held in London this spring. Dorando, whom he beat out for first place, will also run.

The R. A. A. Marathon promises to be a bigger success this year than ever. It will be a tryout for the Olympic candidates, and for that reason there will be a second entry list. It is stated that Clarence DeMar may not run, as he will not have his card in order to be picked for the Olympics. He has already been chosen to go to Sweden.

ATHLETICS.

The Freshman-Sophomore meet held at the Field Saturday afternoon last, was successful from one point of view at least. A number of men came to try their respective merits against those of their fellow schoolmates. The times and distances were very much slower than those of their fellow schoolmates. The innate decency and refinement, which was only to be expected at an early period of the Spring season.

One fact was more than ever clear, however, and that was there must be much more talent lying hidden in the Institute. Now, why don't these men come out and help the school? We seem to be continually bringing this idea up before the men, and it ought not to be necessary. With a field and track there is no excuse for men not helping the Athletic Association more than they do.

You may question how we know that there is much athletic talent at the Institute, but we will tell you, that we know of innumerable men have come out for athletics and on three or four world-trips have entered for the New England Intercollegiates, and not only made good, but actually won events. Certain of the men are now around the school and claim they can't find time to go out to the Field and start in training. Now we don't advocate these men taking up sport at the expense of their work, but we have seen them loitering around the school in times when they might easily have been at the Field.

There is another side of the question: When men are training they should do it with their whole heart. It is not right to means self-sacrifice for a while, but the fact that a man is helping the school should be sufficient to cause him to undergo this without demurring. On Saturday, at the Field, we noticed a man running costume practices in the rain, and at the same time smoking a cigarette. At any other school this man might have received a very unpleasant time of it; but here at Technology the scarcity of material ties hands and does not afford a chance for an Intercollegiate tournament. This should be a form of winter exercise that Tech men could take up with advantage.

Don't Pay Fancy Prices for "Store Clothes" Get a suit that was built for you Not one that looks as if it were wished on you My prices are fair and well within your reach My fabrics bear the style of the "grain" to find the welcome package of Falcon Cigarettes

CATHOLIC CLUB TEA.

To Be Held in the Brunswick, April 13. After the Show.

The Technology Catholic Club has planned to give a tea in the Brunswick Hotel on April 13. It will be held immediately after the Thirteenth performance of "Castles in Spain," and will furnish an opportunity for the members to spend a very enjoyable and entertaining evening together. The officers have put forth every effort to make this affair a success. Mrs. James M. Morrison has consented to act as matron.

During the last few days representatives of the Westinghouse Company have been interviewing the Seals of Course VI. about employment after graduation.

The Glue Club of Oberlin College, Ohio, last Wednesday night had to sleep in a trolley car on the road from Sandusky to Oberlin. Two of the men, who left Oberlin, sprang miles to the railroad, and just missed the only train that could get them to the college on time.
