MAJ. COLE PRESENTS
COLLECTION OF BOOKS
Union Shelves Now Well Filled
With Books of Several Standard Authors.

The Technology Union has been fortunate to receive from Major Cole, head of the Military Science Department at the Institute, a large number of books as a start for a Union library.
The collection was delivered today and was found to have in it the works of many standard authors, among which are on the shelf: Plato, Aristotle, Mephisto, and Irving, which will be available at the contest of the book at the right of the entrance to the Union, where they have been placed.

AERO CLUB MEETING.
Mr. Custer Will Speak On
"Centres of Pressure."

The Aero Club will hold another meeting Wednesday afternoon, and an open meeting will be attended by several of its members yesterday, it was attended by its officers. Among other interesting articles the item will be given a discussion on "Centres of Pressure."

During the afternoon the officers for the coming year will be elected, and other important business will be transacted.

President Lehmann makes the announcement that the Burgess Carlin Company is offering hydroplane flights at twenty-five dollars a flight, and this will probably interest the club it will be brought up for discussion at this time.

All members of the club are earnestly requested to be present, and any others who are interested are cordially invited to come.

CREW PRACTICE.
Men Show Improvement Under Steady Routine Work.

The crew has now settled down to steady routine work which is bringing the men into excellent condition as few will reported yesterday worked under difficulties. Due to the steady attendance within a few days Captain Gere expects to start the men on much longer rows.

All the races that are to be set are at 6 o'clock, and those on the spring meet at 7 o'clock, except on Wednesdays, when the last drill hours keep the Freshmen in till 6 and at any other members of the crew report at 5 o'clock.

The coach has been trying to arrange meets with other crews, but has not made any definite arrangements yet. However, he will probably have important news within a few days.

Extra Assessments for Dance Cancelled
Reception and Dinner Will Make Senior Week a Jolly One.

The Class Day Committee in the meeting yesterday afternoon insti-
tuces in the development of Senior Week. The class has now settled down to get ready for the Senior dance, and an appreciation of a Class Gift which will be presented at the dinner will be held in the Senior dance an event which would be open to all of those who had paid their Senior week assessment, and award all further charges.

To the relatively larger number of those who will attend the reception it was thought advisable to obtain more information and that arrangements be well attended at the Hotel Fullerton, and the large hall at the Hotel Fullerton, in which the reception will be held, has been reserved for, and, with-out doubt, will be used for this fest-
tivity.

The events of the evening will con- sist of a reception lasting about two hours, after which the dance will be held at the hotel, and will be followed by a dinner the latter part of the evening, followed by a continuation of the dance order.

It has been estimated that over eight hundred people will be in at-
tendance at the reception, and as the halls are only under, really unconventioned date 250 couples. It is believed that this will be enough to fill a crowded floor.

The expenses of such an evening will closely aggregate $80, which will be a goodly part of the total fund ab-

 been wanted by the committee for its expenditures, but the feeling is prevalent that each member will do his share in the evening's entertain-
ment worthy.

Two rehearsals are already scheduled for this week, one on Thursday, and another on Friday, at 4 o'clock, and another will probably be held the last of the week.

Catholic Club DINNER TONIGHT
Future Plans to Be Discussed—
Father Cusick of Boston College is Speaker.

The final informal supper and meet-
ing of the year will be held at the Catholic Club this evening in the Union at 6 o'clock. There is still a large amount of business left for fur-
ther consideration from the meeting held in the Catholic Church on Sunday. This, together with the reports of several committee members and the promise of a talk from Father Cusick, president of Chemical Engineering Department at Boston College, makes the meeting an interesting event will be by all members.

Father Cusick, a member of the So-ciety, has had a close contact with the scientific world through his professorship, and is a noted au-thority on many religious-scientific con-
troversies. He is a graduate of Brown University, and has become a well known figure in general science. His position has brought him before the public many times, and his reputation as a speaker has long since been established. The commit-
tee assures the men that his talk will close the season in a most interesting fashion.

ORCHESTRA.

Since it has now been definitely decided that the Orchestra will furn-
ish music for the Spring concert of the Musical Clubs, the members have settled down to two weeks of real conscientious work and are giving special effort to make their show in the evening's entertain-
ment worthy.

ARCHITECTS' MEETING.

A short meeting of the Architectural Society will be held this afternoon in Room 301. The meeting has been called to transact busi-
ness of an important nature, and the officers hope that every member will make an effort to be present.
