TRACK OUTLOOK

The annual interscholastic drill competition under the auspices of the Minnesota Institute of Technology will take place in the Irvington Street Armory at 5 o'clock this afternoon. The neighboring high schools have been invited to send squads of their three best men to compete for the honors which will be awarded to the winning schools. The first two schools will get a shield, and two models, will be awarded to the winning schools.

After the competition the Minnesota Institute of Technology will be drawn up in a parade formation to the strains of the M. I. T. band and the prizes, a shield and two models, will be awarded to the winning schools.

Mr. G. L. Carpenter Will Speak Tonight.

The next to last meeting of the Mining Engineering Society will be held tonight at the Union, at 5 o'clock. Mr. G. L. Carpenter will give the society an informal talk on the adventures and experiences in the Alaskan coal fields. He will tell in detail of the scientific management of the mine there, which is one of the best in the world. Mr. Carpenter is highly well fitted for a talk on this subject as he is recognized as one of the leading mining engineers, and has patented many appliances which have revolutionized the mining industry. Refreshments will be served at the close of the meeting.

WATER FILTRATION.

Chemical Society to Hear Weston on the Pittsburgh System.

The Institute Chemists will be favored with a valuable talk on the "History of the Pittsburgh Supply," by R. S. Weston, '94.

Weston's talk has been arranged on the tryphcal fever situation and is of a nature that will appeal to the interest of the sanitary and medical societies. He has been interested in the work of the sanitary department and has traveled all over the state of Pennsylvania. He is thoroughly able to handle his subject and give the nontechnical word which will be of great interest to them.

ARCHITECTS' MEETING.

At 2 P. M., on Friday, April 30th, the Architectural Society of the Institute will hold its business meeting, at which the officers for the coming year will be elected. It is probable that the plans for the joint meeting with the Architecture Engineering Society will be discussed.

ALUMNI COMMITTEE REPORTS BIG PROGRESS.

Grads Respond Instantaneously to Call for New Institute.

One hundred and ten thousand dollars, subscribed by the Alumni of the Institute for equipment and other items, is the amount the Alumni Committee has raised at the end of the first two days of the Alumni reunion. This sum was mailed in Boston only Tuesday evening of last week, and since a large percentage of them were addressed to places two or three or more days distant, the amount represents almost instantaneous gifts by Alumni.

That this total of 150,000 figures has been possible in so short a time is exceedingly gratifying to the committee, which looks for a substantial result when the Council of the committee, Everett More, senior, and chairman of the committee, has announced the Alumni Association to congratulate them on their good work and to indicate their appreciation for the contributions to their Alma Mater.

CALENDAR.

In Charge of S. H. Taylor, 1914.

Wednesday, April 20, 1912.

5:00-Mining Engineering Society—Union.

Thursday, April 21, 1912.

1:30—T. C. A.—Union.

2:00—Architectural Society Meeting—Union.

5:00—Chemical Society—Union.
