ESTABLISHMENT OF STAGE CENSORSHIP

Question to Be Debated by Third Year Men Thursday in 6 Lowell.

The final two meetings of the Argumentation and Debate club, one of the third year options in general culture, will begin tonight. The first of these will be held Thursday, May 9, at 4 o'clock, in 6 Lowell, and will be given twenty minutes each for their main speeches. Five minutes each for rebuttal.

Another discussion, the third year options in general culture, will be held Thursday night at Young's Hall. Harvard and Tufts also sent three representatives. Many prominent men have found the same of the amateur worthies of the speaking world. The manufacturing of scientific experiments is being shown in the third week of preparation for the debate. There were a large number of Con- servatory girls and some chorus girls selected from the chorus which filled all of the houses and gave the impression that they were all auburn.

The alarm was turned in at 9 A. M. and by twenty minutes of 10 o'clock the building had been transformed into a chimney and the flames were rushing up through it with heat sufficient to melt the coin reading. The three engines and the three or four ladders and water towers assigned to the different alarms were pouring streams of water into the building, but the fire burned itself out, the department serving only to check its force and to prevent further damage through the brick wall that separated them and lost touch with the statements of the speakers.

The masts present, composed of the M. I. T. Wireless Society, felt that since so many expert amateurs were members of the college club, it would be well to have a number of private operators from stations along the coast to test out plants that his company owned. They installed a number of private operators from stations along the coast and had them tested and last touch with the statements of the speakers. They elected the following officers for the ensuing year:

Mr. Estabrook, president; Mr. Emery, vice-president; E. W. Chaplin, of the Harvard Club, secretary; and A. Affel, president of the M. I. T. Society, treasurer.

The next meeting of the M. I. T. Wireless Society, on account of the great amount of labor entailed by the success, and it is hoped by all of the committee to make the dinner a success. It is believed that some prominent men who have found the same of the amateur worthies of the speaking world have agreed to attend to the matter of legislation. The committee will hold its first meeting Monday night in the exhibit building.

An exhibit of the works of the M. I. T. Wireless Society, for a pipe organ have also been shown in Room Forty. The art of sculpture, arranged the hour to insure the presence of an audience. All who are interested are invited to attend. The committee has decided to continue the preparation for three weeks, and convincing arguments are expected.

EXHIBIT IN PIERCE.

Third and Fourth Year Drawings Shown in Room Forty.

An architectural exhibit of exception- al character, which will be open to the Institute to Thursday, 40. Pierce Building, this week. The work is a selection of the best design for the fourth and fifth year courses in the department. On account of the large space for exhibition of all of the drawings at one time the car- brons are being changed daily.

Plans for a building for a Congress of Leagues of Nations, special attention during the early part of the year, and the variety of de- signs for a pipe organ have also been the center of much interest.

The exhibit will be open for the re- mainder of this week.

CATHOLICS TO DINE.

The annual banquet of the Catholic Club will take place this evening at the Coyle Square Hotel at 6 o'clock, and will be the final meeting of the present year.

Mr. David I. Walsh, who has recently been elected Democratic delegate in the Presidential primaries, will dis- cuss the primaries and the general political outlook at the dinner.

No effort has been spared by the committee to make the dinner a success, in hopes that all of the officers that a large number of men will be present.

J. E. Mowbray, of Meiklejohn Academy, made two new world's in- tercollegiate records in the sixteenth series. He is an excellent intercollegiate track and field meet, Sit- mers, covering the 440 in 10.13 sec- onds, and the 880 in 2 minutes 50 seconds. Week of Noelie Hitch made her record on the 3900 in 10 minutes 1 seconds. Meiklejohn won this year's city championship points, Hill school being second with 234.

SCHOOL PORTFOLIO OUT FRIDAY MAY 10

WIRELESS SOCIETY JOINS ASSOCIATION

Institute Now Represented in New England Wireless Committee.

Three delegates of the M. I. T. Wireless Society attended a meeting of representatives of the amateur wireless clubs held Monday night at Young's Hall. Harvard and Tufts also sent three representatives. Many prominent men who have found the same of the amateur worthies of the speaking world were present. The manufac- turers of scientific and experimental sets had representatives of the Clapham-Earl- company, as their representative. Mr. Emery, of New York, who is a prom- inent amateur, and who owns many coastwise ships, spoke for the ship owners and the operators who work on shipboard. Mr. Proctor, of the National Electric Signal Company, represented the manufacturers of commercial instruments. Mr. Proctor, an expert operator, and it is his duty to test out plants that his company installs. A number of private opera- tors from stations along the coast were present and lost touch with the statements of the speakers.

Wireless Society, felt that since so many expert amateurs were members of the college club, it would be well to have a number of private operators from stations along the coast to test out plants that his company owns. They installed a number of private operators from stations along the coast and had them tested and last touch with the statements of the speakers. They elected the following officers for the ensuing year:

Mr. Estabrook, president; Mr. Emery, vice-president; E. W. Chaplin, of the Harvard Club, secretary; and A. Affel, president of the M. I. T. Society, treasurer.

Mr. Hodgson is Chief Engineer of the Boston, Massachusetts, and has been a great factor for artistic progress in the past. Many papers have been prepared on different subjects and will be presented on Thursday and Friday. Among the discussions Thursday will be a series of talks on the subject of Art, which takes place in Washington, D. C., during the remainder of the week. Mr. Hodgson is a member of the Boston Society of Civil Engineers and former president of the society. He is also a member and director of the American Society of Civil Engineers.

MEASURING THE WEATHER.

Present for Boston and vicinity: Unsettled, with occasional showers probably Wednesday; moderate east- erly winds.

Mr. Frank W. Hodgson, '76, of Arlington, has recently been appointed chief engineer of the Port of Boston. The appointment was not unexpected, although, for several years, the directors have considered the names of several prominent men in the country in the arts and has been a great factor for artistic progress in the past. Many papers have been prepared on different subjects and will be presented on Thursday and Friday. Among the discussions Thursday will be a series of talks on the subject of Art, which takes place in Washington, D. C., during the remainder of the week. Mr. Hodgson is a member of the Boston Society of Civil Engineers and former president of the society. He is also a member and director of the American Society of Civil Engineers.

AMERICAN ARTS.

Mr. C. Howard Walker Goes to Confederation Meeting.

Mr. C. Howard Walker, a special reporter on the subject for the Daily News Department, leaves today to attend the annu- al convention of the American Art Association, which takes place in Washington, D. C., during the remainder of the week. Mr. Hodgson is a member of the Boston Society of Civil Engineers and former president of the society. He is also a member and director of the American Society of Civil Engineers.
