FRESHMEN DEFEAT THE SOPHOMORES

Underclassmen Take Second Game of Series—Score 4 to 3

With a tie score of 3 to 3, two men down, and the bases full in the ninth inning, Scully brought in the winning run for the Freshmen with a short infield hit. The game was fast and interesting, and after three innings had been played, it was evident that a third game was necessary to decide the class championship.

The Sophomores started the scoring in the second inning with two runs. The Freshmen opened with the run in the third, which cost the Sophomores duplicated in their half of the game; inning; score 1 to 1. There were no more tallies until the eighth, when the Freshmen counted twice, tying the score. The winning run was scored in the last half of the ninth inning.

In the eighth, Caufield started the ball rolling with his single to center, bringing in two scores for the Freshmen. His work throughout the game was characterised by his keenness. He served a pitch as a pinch hitter, and hit a three bagger.

For the Sophomores, Bryant played a good game at third, and Tuttill distinguished himself with his single hit of the game, a three bagger. Bryant was at first looked good for a home run.

Both catchers had their men nailed in the ninth inning. Only two runners were hit, and there was none to score. The game was fast, and Bryant was good at first base, as was main man. This game marked Turner's first appearance in the pitcher's box, and his work was good. Both pitchers were credited with nine strikeouts.

The game was umpired by Pendleton and his decisions were satisfactory at all times.

Debating Class

The last debate of the Argumentation and Debating class will be played on Wednesday afternoon at 4 o'clock, in 11 B. With the debate of last week, this is the last to the Institute. Professor Richards is hoping for an audience.

The question to be debated is: Resolved, that a system of compulsory arbitration of industrial disputes should be established in Massachusetts.

The debaters for the affirmative are: B. C. North, A. J. Pastene, C. G. White, and C. G. White, and those for the negative are: W. E. Colwell, N. N. Norton, and C. G. White. The debate will be held at Maine Mall. This game marked Turner's first appearance in the pitcher's box, and his work was good. Both pitchers were credited with nine strikeouts.

The game was umpired by Pendleton and his decisions were satisfactory at all times.

Summary

Golf Tournament Drawing to a Close

Many Players Win Matches by Many Players Win Matches by Many...}

The winner of the spring golf tournament will probably be decided by the end of this week, as only six or seven more matches remain to be played.

In the first round of matches O. Norton defeated W. R. Roberts, 4-2; B. V. Mason defeated C. V. White by default; J. B. Churchill defeated H. H. Haynes by default; W. French and W. H. Rogers were both given a default; A. L. Todd defeated J. F. Capen by default; W. F. Almy defeated C. M. McAdam, 4-2; N. W. Rogers defeated R. E. Mann, 4-2; R. Russell defeated V. R. Jaynes by default; W. H. Africa defeated J. B. Hall, 1 up; A. E. Howse defeated A. E. Downey by default; C. H. Hull defeated J. C. Good, 1 up; Blatchford defeated Critteden by default. The summary of the second round of matches have also been played, leaving only one more to be decided this week.

The game was fast and interesting, and clearly at all stages and clearly to be played.

Course III Meeting

Election of Officers and Talk by Prof. Richards Today

"My Western Trip" is the subject of Professor Richards' talk to be given before the Mining Engineering Society in the Union at 8 o'clock this evening. This will be the last meeting of the society this year and all the new officers will be elected. For the last time as well as the last time, the question is sure to be very interesting, the present officers urge the attention of every member. After the meeting refreshments will be served.

Professor Richards is in the heart of the Mining Engineering department and honorary president of the society. Several months ago he made a trip to some of the mining districts of Montana. In Colorado he visited Denver, which is the center of the gold and silver fields of that State, and also the famous Colorado School of Mines at Golden. He also traveled at Indian, Wisconsin, where the School of Mines is situated, and at Hancock, Michigan, which is devoted largely to the concentration of copper.

Biological Society

On Thursday afternoon, at 4 o'clock, the Biological Society will hold a meeting in the Union. Attendees for next year's meeting will be announced at that time.

Professor Arlo Bates, Mr. J. R. Ruttler, the printer of THE TECH, Mr. Russell Perry, the professional coach, will be the speakers.

The question to be discussed is: Is the motion made to change the name of the society to the Boston Botanical Society. There are few real good spotters now in the college ranks. Since Marshall of Penn has been laid up, Carey, of Carney, of Wilson and Wilson of Coe College are about the only ones who can be called "so-so". Carney is said to have broken his leg, and Wilson for 9-5 seconds, and Wason for 10.

The Chemical Society held its annual banquet last night at the Copely Square Hotel. The society present had finished the dinner, President. H. C. Allen announced the results of the election of officers for the coming year. C. H. Albee, '13, a member of the Dining Room Commit tee, is the new president; H. O. Himes, secretary, and H. Rogers, treasurer. For the Program Committee, two men, J. P. and G. W. Parer, were chosen.

Professor Talbot, the new president, has the opportunity to speak to the men on the changes that are being made in the Society. He said that both of these changes, especially that of Chemical Engineering, had grown so rapidly that he was going to the Smithsonian for his first lecture to the men on the changes that are being made in the Society.

An interesting article will be the introduction of a compulsory course in Quality Analysis during the summer of the Freshman year. This course, which consists of five weeks, will be given without any extra tuition charge. Qualitative Analysis will occupy the second year, and the extra time gained will be divided among the years. The course will get more shop work, and the mechanical engineering drawing will follow the sciences in mechanism more closely. During both of the terms of the second year a new course in Chemical Engineering will be introduced. Daily lectures will have three terms, work in experimental problems in general, theoretical and organic chemistry in preparation for research problems.

After Professor Talbot had requested the changes in their addresses and positions, the members were entertained by a short speech. They sang "That Busy Day" and several others. After the program broke up with a regular M. I. T.

The American Marathon team should be able to clean up anything in Sweden. In the South, Hurler, Schecter, Waddell and Munn running, the team seems to have a poor chance of winning.

The Weather

Forecast for Boston and vicinity: Wednesday: fair, western: very cloudy.

Calendar

Wednesday, May 15.
6:00—Mining Engineering Society—Union.
Thursday, May 16.
4:00—Election of Officers for Consociation.
3:00—Battalion Inspection—South Armory.
4:15—Cosmopolitan Club—Elections of Officers—Union.
5:00—Battalion Banquet.
Friday, May 17.
6:00—Price Drill—Boat Armory.
