TECH NORTHFIELD

DELEGATION PLANNED

Annual Conference Will Be Held
On Banks of 'Connecticut' in June.

This year, for the first time, the Technology Christian Association is planning to send a delegation to Northfield Student Conference, which meets at East Northfield, Mass., from June 21 to July 1. One or two Tech men have attended past conferences, but this is the first Tech representation.

The spirit of Northfield is the spirit of the open-minded and active Christian. It stands for a full development of all the powers of every college man as a means of bringing Christian religion to the needs of men. This time is provided by recreation, study, recreation, and social intercourse; the meetings and events are taken up entirely to recreation, football, tennis, swimming, and walks in the hills of the Connecticut valley.

There are two regular meetings each evening, one informal and out- door, the other in the auditorium. Just as sunset the Conference gatherings on Round Top for the Life Work Economy, which the delegates are apt to look back upon as the best of a host of good things. The delegates sit facing the Connecticut valley and river just as the sun sets, and usually remain until darkness. The talks are short, and designed to be valuable in helping them choose their profession.

The other evening meeting is more in the nature of a church service with a regular sermon, and is held at eight in the Auditorium. Later the separate indignities, often meet for their private discussions.

There are various classes, among them a series for the men who expect to occupy positions of leadership in the Student Associations, and the T.C.A. is especially hoping that some of the men here will attend so that they may carry on the work in the Institute more singly, enthusiastically, and successfully than will be possible otherwise.

The list of speakers includes men of national and world-wide reputations. Among them will be the Rev. D. S. Cairns of Aberdeen, Robert E. Speer, John R. Mott, and Rev. G. A. Ensign, four-in-Hands.
