TECH FORTUNATE IN COMING OF J. K. TAYLOR

Architect of National Prominence
Now Member of Institute Faculty.

With the coming of James Knox Taylor, Tech, '79, to the Institute as Professor of Architecture, "The National Architectural Journal" has been publicly called, strengthens what is already the foremost school of architecture in this country, and brings to Technology a man whose position has been one of the most important, professionally, of any that exists.

His colleagues unite in their praise for the work he has done as preparing architect of the Treasury department of the United States Government, and give him the entire credit for the vast improvement that has taken place in the government buildings during the fifteen years he has had the position. R. Chipston Sturgis, a prominent Boston architect, said in learning of the invitation: The Institute of Technology is to be congratulated on having secured the services of Mr. Taylor. It will be of enormous service to the department to have a man with so wide a range of experience in design and construction, and who has shown himself as well and able an executive."

PROF. DESPRADELLE.
(Continued from Page 1.)

P. Miller has been appointed Assistant Professor of Mechanical Engineering, having been confirmed. Professors C. P. Park, J. C. Riley and C. W. Berry have each been advanced one grade. Mr. Walter J. James is now Assistant Professor of Mechanical Engineering Drawing. Three of last year's assistant personnel has been advanced. Mr. R. W. E. Morrison, Mr. H. A. Forbes, and Mr. G. W. W. Forth. Mr. F. E. Haywood is now Assistant Professor of Mining Engineering and Metallurgy. R. H. W. Wilbur, Mr. E. Coolidge, has been promoted Prof. Despradelle. It will be of enormous service to the department to have a man with so wide a range of experience in design and construction, and who has shown himself as well and able an executive."
