THE TECH

VOL. XXXII. NO. 3

BOSTON, MASS., WEDNESDAY, OCTOBER 2, 1912

PRICE TWO CENTS

FIRST TRACK MEET COMES SUNDAY

"T" Men Will Be Barred—Prizes Awarded in Each Event

Track meet will be held on Saturday afternoon, October 12, for all but T men. This will be scratched and the first of a series of three held before the fall handicap meet. In the two following contests the men will be handicapped according to their ability shown previously. The handicap is the second event posted in the columns of THE TECH on the preceding Wednesday, and for the last on the following week.

The events in each meet will be the 100-yard dash, the 220-yard dash, the 440-yard dash, the 1-mile run, and the 440-yard hurdles. The field events will be the high jump, the broad jump, and the shot-put. This series is the first of this kind ever held at the Institute and promises to be a decided novelty. The barring of the T men will serve to bring men of equal ability together and some interesting finishes are looked for. Points will be awarded to the first three men in each event. These points will be summed up at the end of the series and the winner will be given. In addition awards will be made to the winners of the first three places in each event.

Coach Kanaly is attaching much importance to the meet, and will have some means of bringing out all material known and unknown in the lower classes. Undoubtedly, one of the main reasons that the Institute track teams have had to come in with the lack of competition before the big meets. The present idea is designed to eliminate this handicap in a great measure. These contests are in line with the idea of the Faculty and Advisory Council on athletics. It is desired that the new men be brought within the fold of these games, that all the entries will be on an equal basis in regard to the amount of training. Each man will be carefully watched by an experienced runner in the meets. The coaching will be the scheme in the coaching to get information for further development of our track men and under the charge of Captain Germain.

TECH'S NAVY GROWING

A matter of great interest at the Institute has been the launching of the "Fulton," the second vessel of the Tech Navy. This is called, like the "Freese," to have her home in the Charles River basin, with its testing grounds among the embankments. The "Fulton" was built under the eye of the Department of Architecture in the shops on Garvan's Street. As a matter of convenience the keel was laid on the Charles River side, but when the boat is launched the body will be turned over and the vessel lowered to the street on crib work.

"Blacklegs" over ready honors will be missed at many student dinners this year.

Have you got $2.00? If so, have you subscribed for THE TECH? Hurry up while you have the chance.

AMERICAN EDUCATIONAL INSTITUTIONS SUPREME

President Maclaurin Considers U. S. Supreme in Educational Excellence.

President Maclaurin returned from the 17th of September from a trip to the British Isles and Europe, after having spent the entire summer abroad on technical work. His personal investigation of the different technical institutions was mainly confined to the English educational institutions. During the last few months he has devoted his entire time working over the general technical school of note in Europe which has been received by the President.

Dr. Maclaurin considers that owing to the tremendous increase in the number of college buildings during the last few years in this country, the United States stand supreme in the matter of educational excellence. More is to be learned by studying the different methods in vogue here than by watching the foreign universities which work under entirely different conditions.

The salient features of the information to be gained by President Maclaurin will be discussed by the corporation members present. The good news is that prepared practicals will be embodied in actual form in the new Technology.

DINING ROOM THURSDAY.

Several New Tables Added and New Cement Floor Laid.

The extensive alterations which have been under way in the Dining Room for weeks have at last been almost completed. The announcement is now made that it will be open by Thursday noon at the latest. Mr. Colton, who had hoped to have the room ready yesterday, but was disappointed, had hoped to have the room completed, so as to be able to offer the best possible service to the large crowds which always turn out on the opening day.

The entire place has been cleaned, set by him. The school has now been arranged as the auditorium up to the standard of Professor Duquesne has the proper advice of Professor Despradelle. Among his many pupils, Professor Duquesne has included, among others, Mr. A. L. Strong, Mr. P. Wardsworth, and Mr. A. M. Bredin.

In 1911 Harvard University, on the advice of Professor Duquesne, invited Professor Duquesne to take charge of its architectural department. The Boston Transcript remarked of his coming editorially, "It is noteworthy that Harvard in selecting the best teacher to be found in this country." In 1912 the Institute has attained in the Architectural Department in the United States a position of the same standard. In 1903 he won the much coveted honor of the Grand Medal of the French Institute. Many of the original drawings made in the atelier have been conserved; and, although he has been greatly occupied and has received several invitations from his succession for ten and fifteen years later. On his return to Paris he was honored by being invited to General of the Architectural to the City of Boston.

As a draughtsman, he is considered one of the best in the entire world. He has done considerable work as an instructor, and among his many pupils are a number of well known Boston architects, including Messrs. Guy Lowell, Allen H. Poynter, P. F. L. Richards, and P. Wardsworth.

Professor Duquesne comes to Institute by invitation of the American Institute of Architects.

Professor Duquesne comes to Institute by invitation of the American Institute of Architects. He is the second vessel of the Tech Navy and has been built by the Department of Architecture at the Institute. He will set the place vacant by the recent death of Professor Despradelle, in selecting him to provide the inspiration that faculty has attained in the architectural world, Technology centers upon Professor Duquesne the honor of being the best man in this emergency that could possibly have been procured.

Professor Duquesne is a graduate of the Ecole de Beaux Arts, of which the late Professor Despradelle is also an alumnus. His work as a student in Rome, and in the Villa Medici, will always be remembered. From 1903 he won the much coveted honor of the Grand Medal of the French Institute. Many of the original drawings made in the atelier have been conserved; and, although he has been greatly occupied and has received several invitations from his successors for ten and fifteen years later. On his return to Paris he was honored by being invited to General of the Architectural to the City of Boston.

As a draughtsman, he is considered one of the best in the entire world. He has done considerable work as an instructor, and among his many pupils are a number of well known Boston architects, including Messrs. Guy Lowell, Allen H. Poynter, P. F. L. Richards, and P. Wardsworth.

In 1911 Harvard University, on the advice of Professor Duquesne, invited Professor Duquesne to take charge of its architectural department. The Boston Transcript remarked of his coming editorially, "It is noteworthy that Harvard in selecting the best teacher to be found in this country." In 1912 the Institute has attained in the Architectural Department in the United States a position of the same standard.

An alumnus of the same institution as Professor Despradelle, and in his younger days one of his pupils, Professor Duquesne has the proper training to fit him to succeed his valued friend. In a personal interview he expressed his desire to carry out the program of Professor Despradelle. He will now wait until advised.

HARE AND HOUND SATURDAY.

Saturday afternoon the Hare and Hound men take their first run over the course which they will run in the future. These events will begin on the Newton Y. M. C. A. grounds and make four circuits, finishing at the starting line. Sixteen teams have run already, and two more are expected to come in before the run takes place.

FRESHMAN FOOTBALL SCHEDULE ANNOUNCED

Game at Somerville First of Season—Four Others Arranged.

Plans have been made for the Freshman football team to start the season with a game with Somerville High at the end of this week. A schedule, consisting of five games, has been arranged, and two more are being planned so that the younger men will work well in getting into shape to tackle the Sophomores on Field Day, which is only five weeks away.

Coach Charles P. Cashley, formerly of Somerville and Malden, has been secured to whip the recruits into form. He is the best man for the work around the city, for he has a record of six championships out of ten seasons of coaching. He helped create the memorable Somerville team of two years ago that defeated the renowned Walpole boys, and also the Malden team of last year that defeated the excellent Cambridge team. He was the new star for three years on the Brown "Varsity" and everything that came its way. This fall he has played for three years on the Brown "Varsity" and everything that came its way. The schedule that has been arranged is as follows:

October 5—Somerville High at Somerville.
October 11—Tufts Second at Medfield.
October 19—Rockbridge Hall at Wellesley.
October 26—Open.
November 2—Newton at Newton.
November 9—Seymour's at Tech Field.

TECH HAS BULL MOOSE

Meet in Union Friday at 1:30—Active Work Promised.

Next Friday, at 1:30, several of the Bull Moose clubs are going to hold an organization meeting in the Union. There will be many students, professor and employee who is in sympathy with the principles of the Progressive Club. They want every student, professor and employee who is in sympathy with the principles of the Progressive Club to be present. The members of the proposed Progressive Club will be given opportunity to do active work for the party at the polls and the district headquarters. Those who have the suffrage will be shown how to register as voters in this city.

Saturday afternoon the Hare and Hound men take their first run over the course which they will run in the future. These events will begin on the Newton Y. M. C. A. grounds and make four circuits, finishing at the starting line. Sixteen teams have run already, and two more are expected to come in before the run takes place.
