TECH GRADUATES
WIDELY DISTRIBUTED
New Register of Former Students Published During the Summer.

One of the most interesting of Technology events that occurred during the summer is the publication of a new Register of Former Students, in which is listed ninety per cent of all living past students of the Institute.

The distribution of these graduates throughout the country and indeed the world is an interesting study, and an analysis of the figures serves to show what are the central centers of the country, and what the demand is for men of special training. New York and California form the two strategic regions, the first in the East and the second in the West. North of the Mason-Dixon line the following states, in order of importance, have the largest representation of the 325 graduates. Pennsylvania has 32, New York 27, Massachusetts 21, Ohio 19, Illinois 17, and Missouri 16. The other states have 48 graduates, the three largest numbers being in the states immediately north of the Mason-Dixon line.

The Register also lists the graduates from foreign countries, which total 32, or 9.7 per cent of the total. The number of graduates from foreign countries is by far the most important feature of the Register.

The Register is available upon request at the cost of one cent a copy. States and her territories are 436 men, and the rest of the 323 in the mountain States, in groups of twenty to a State. On the west coast are 401, California taking the lion's share, with 270. In the ten states from 20 to 50 are New York, Pennsylvania, Ohio, Illinois, and Missouri, with 41 in each. The rest of the 323 in the mountain States, in groups of twenty to a State.

The Register is available upon request at the cost of one cent a copy.
