SEVERAL SOCIETIES HAVE BEGUN WORK

The Early Birds Have Already Begun Collecting Dues.

At this time many of the professional societies and clubs of the Institute are beginning their year's work. The first meeting of the year will be that of the Eta Club, which comes this noon at 1. The Chemical Society and the Civil Engineering Society held officers' meetings Thursday, and both are planning meetings in the near future. The Cosmopolitan Club is going to make its plans for the year at a meeting Monday.

The officers of the Wireless Society have already been invited to a meeting of the New England Wireless Association, which was held at Harvard last week, and they have arranged to have the next meeting at the Institute. The Association is the result of the association last year for a cooperation among the amateur Wireless Clubs and the M.I.T. Club is represented through its president, H. A. Aitken, who is the treasurer of the Association.

The Catholic Club has made plans for a meeting in a little more than a week, The Biological Society is obtaining many members through the activity of its officers in obtaining dues.

There are several other societies that usually begin active work early in the school year, but so far nothing has been heard from them.

T. C. A. RECEPTION (Continued from Page 1.)

...and one for the box next door was a royal opportunity to meet Dean Burton, Major Cole, Professor Talbot and Coach Ramsey. The winning of the official red and gray buttons, the official insignia of the Institute, was urged upon the new men. He spoke against the politics that have made a few of the elections in the past disagreeable, and expressed the hope that the feature will be eliminated.

Mr. Peck ended his talk with the admonition to be sure and mix with other students and in this way become broader and bigger in every way.

The quartet then sang two selections, which were very warmly applauded.

E. B. Germain, '13, gave a talk on athletic activities at the Institute, tallying up the different sports and explaining the advantages of each. He urged the new men to try out for the Field Day teams, saying that good material among the Freshmen was often discovered in this way.

He pointed out that the track work, such as cross-country, bare and bound, and relay was especially valuable.

T. C. A. reception will be held at the Thursday noon talk next week would be President Martin of Boston University. Mr. Talbot heartily welcomed the fellows and extended his help to the men at any time.

COMMITTEE (Continued from Page 2.)

All the standing committees will be expected to report and any new committees will be expected to be present. Any business may be left at the Cage for the treasurer.

Technology Men will make no mistake in depending upon this Great Store for the Newest and Best Ideas in

Clothing, Hats, Shirts, Haberdashery, Shoes, Hosiery

and in fact everything—that has a place in the College man's wardrobe.

All Men's Goods are in our men's store section separate from other parts of the store and having direct entrances from Avon and Summer Streets.
