FRESHMEN DINNER.
(Continued from Page 1.)

It provides new means of their getting together and learning to know each other. The professional societies are of special benefit to the fellows, in that they serve to broaden their minds and also furnish a chance for social life. He spoke particularly of the Civil Engineering Society, which is the one in which he is most interested, and he said that he had learned much in regard to a relay team for Field Day, and he told the fellows to come out for the team. The purpose here is to make all men out of students, and not students out of athletes, as in the case in a number of colleges. He said that if any fellow will come out to the field he will be glad to help them in any way he can. The Class of 1916, so far, has shown much interest in regard to a relay team for Field Day, and he said that it was up to the class to turn out more men in the future.

H. D. Peck, as a member of the Advisory Council of THE TECH, then spoke to the fellows of the work done by THE TECH. He said that he hadn’t realized until last year, when he was appointed to this position, that THE TECH really meant to Tech men. If the paper were to suddenly cease, he said, the fellows would realize that there was something missing around the Institute. He ended by urging the fellows to get out and work for Field Day, or they would always regret it, for their performance on this occasion is looked upon as a measure of their ability as a class, and their status as Tech men.

The Editor-in-Chief of THE TECH was the next speaker, and expressed a hearty welcome to the members of the Freshman class. He said that Technology men are put in a fine position and possess advantages that no other college men have. Fellow coming here have three duties, to their parents, to Tech, and to their country. In closing he said that THE TECH has a certain position here which it endeavors to fulfill; it is the least of all the paper to criticize, through the editorial column, and every one is requested to express his opinion in communications to the paper.

Opening, the temporary class council, then addressed the class and urged the fellows to come out for Field Day. He said the football team had already made a good start and there was quite a number of men quite enthusiastic for the sports teams, but only half a dozen men have showed up for relay work.

William Rhodes, temporary class treasurer, then made an appeal to the fellows to pay their dues before Field Day, and he urged all to come out for Field Day and beat the Sophomores. They then
