GOLF CLUB ELECTS
SEVERAL OFFICERS

Many Freshmen Out for Team—Club Increases Its Membership.

At a meeting of men interested in golf, which was held yesterday, at 3 o'clock, in 51 Nagle, it was decided to have the election of officers at the beginning of the fall term, and to have three officers serve through both terms.

The men elected A. E. Howlett, '15, president; W. H. Mason, '15, secretary-treasurer, and N. P. Wilson, '15, publicity agent. The meeting was made up for the most part of new men, and when the former members are considered the club will have an augmented membership of thirty.

Arrangements are to be made for the use of the grounds of the golf clubs at Wollaston, Newton, and Woodland during the fall term. The men may have to pay for each day's use of the links, although there is a possibility of arranging for a definite price for the term.

The new president was authorized to appoint a tournament committee, but its membership has not yet been decided upon. The committee will arrange match places, obtain suitable caps and medals, determine handicap, plan all tournaments. It will also make arrangements with outside teams.

All men who are all interested in golf are urged to come out and have a good time, for the arrangements for the use of the links will soon be completed.

H. S. Morse, '02, has been appointed engineer in charge of the Division of Water Investigations, Design and Plans Department of Public Service, the city of Cincinnati, Ohio. Mr. Morse is a graduate of the Institute, and for a number of years was with the United States Reclamation Service on the Lower Missouri Irrigation Project. Later he was resident engineer in charge of construction for the Reclamation Commissioners of Louisville, Ky. The city of Cincinnati is about to spend $125,000 on a comprehensive sewerage investigation.

and allied subjects in the United States. He devoted his vacations while at the Institute, and a year or two afterward, to obtaining practical shop experience in various engineering lines, afterward beginning superintendent of a mill in Rockport until he went into the service of the Faraday Mutual Insurance Co. as their engineer and later vice-president. In 1907, when that department was moved to New York, since which time he has been in consulting engineering practice. For many years he has been secretary-treasurer of the National Association of Cotton Manufacturers, and much of his engineering work has been devoted to special investigation along the lines of his experience. He has received an honorary degree of D. Eng. from Tufts College, director of science from Union College, and doctor of science from Dartmouth College. He received the medal of 1883 from the Societ Industrielle de Mulhouse of Alsace, Germany, for his work on mill construction; the John Scott medal of Philadelphia for the preparation of the first insurance tables providing for the installation of electric light apparatus in 1885; and the association medal of the National Association of Cotton Manufacturers in 1910 for his "Hildomograph of the Cotton Manufacturer."

T. T. H. Morse, president; D. V. Mason, '13, secretary-treasurer; W. A. Ashley, '13, second vice-president; H. S. Seabright, '13, third vice-president; N. R. Willett, '16, treasurer. These officers serve through both terms.
