PROGRESSIVE CLUB TO GIVE SMOKER

Richard Washburn Child to Speak in Union Tomorrow Night—Smokes Free.

Tomorrow night the Progressive Club of the Institute will hold its first meeting since its organization, in the Union, at half past seven o'clock.

Richard Washburn Child, the famous Progressive and writer, together with other interesting speakers, will talk at a smoker which will be open to all students.

Mr. Child has been closely identified with the progressive movement since its birth, and early in the spring, when Colonel Roosevelt "threw his hat in the ring" here in Boston, he, together with Matthew Hite and two or three others, paid their dues for the year Roosevelt, and it was due to this group more than any other that the progressive movement in this city came into being. In the first part of the month Mr. Hite gave an open break with President Tait in the Massachusetts presidency. Mr. Hite was graduated from Harvard in 1902, and went to Boston for law, which was the author of several books and has been especially popular as a magazine writer of fiction.

Every student at the Institute, whether he is in sympathy with the Progressive movement or not, is invited to come to the smoker. All smoking materials will be supplied by the club and no charge will be made.

Still Moors bottom and pins may be obtained from this club, and men wishing to enroll as members may do so by leaving their name at the Cage for C. A. Sandburg.

CHEM. SOCIETY DINNER

Professors Talbot and Walker to Give Informal Talks.

At 5.15, tonight, the first meeting of the Chemical Society begins with a dinner. This will be followed by talks given by Professor C. A. Sandburg and Professor Walker. Professor Walker has had almost no opportunity to meet the members of Course X since he was appointed head of that course, and he will probably have something to say that will interest all the prospective chemical engineers.

Four other professors, representing the instructing staff of the Chemistry Department, will be there to show the students what is being done in the chemistry laboratory.

A special meeting will be held tomorrow afternoon at 3.15. Meetings of this kind will be held at all meetings of the society.

MANDOLIN REHEARSAL

Over Twenty Men Present at Yesterday's Meeting.

The Mandolin Club held its first rehearsal yesterday at the Union Club. The Mandolin Club has been in existence since its organization in the Lowell Institute Club of the Institute will hold its first meeting since its organization, in the Union, at half past seven o'clock. Richard Washburn Child, the famous Progressive and writer, together with other interesting speakers, will talk at a smoker which will be open to all students.
