M. E. SOCIETY TRIP TO WATERTOWN ARSENAL
First Trip of the Year Proves To Be a Big Success.

Yesterday afternoon about forty members went with the Mechanical Engineering Society on the first trip of the year to the Watertown Arsenal. The party was shown the different shops in the making of guns. They were first taken to the foundry where they saw the metal heated into the molds. The men also had a chance to see some finished pieces of ammunition. From there they went to the "setting up" shop where the gun carriage are assembled. Next the machine shops and the forge shop were visited, where trip hammers and drop forging were in operation. From there they went to the testing house, where they saw the 1,000,000 pound testing machine which is used for testing all materials. Everybody had an enjoyable time and expressed themselves as having been on the best trip ever taken by the society.

FALL HANDICAP MEET.

End anal—L. Laurason.

With a view to raising the standards of scholarship of fraternity men to the high standards of most prominent men at Vanderbilt University, a scholarship cup has been donated. It will be awarded to the fraternity whose members in the Academic and Engineering departments make the best record. The cup will be held for one year. It won three times the fraternity gets permanent possession of the trophy.
