GOOD ENTERTAINERS FOR SENIOR DINNER

Tonight every single Senator will be on hand and ready to give their committee a chance to show the very best entertainment, surely designed to attract and impress those who have never been asked before. They have spared no pains or trouble in securing the most perfect of their own, and have made arrangements to make the Senate chamber, now the usual place, the best possible entertainment for the Senator who has never been entertained before.

SHOW BOOKS DUE AT CAGE NEXT WEDNESDAY

Writers Who Enter Competition for Book Must Follow Instructions Closely.

The time is growing short now in the month of November for the writers who will soon be entering the Cage next Wednesday, the 13th of November, at 4 P. M. All the manuscripts must be written on one side only, securely fastened and provided with a substantial cover. Numbered envelopes may be obtained at the "Cage," and every prospective author must obtain one of these and place therein his name and address; then number his book according to the number on the envelope, and leave both book and sealed envelope at the "Cage" for Charles H. Finley, Professor of English and head of the Stage Department. These instructions must be followed out to the letter in order that the books shall be considered.

It is of the greatest importance that a book be obtained which shall be of sufficiently high character to keep up the standard which has been set by previous shows. In order that the judges, who are all noted men, should make the most of their intentions and the greatest value in this matter it is necessary that more books be written and sent in order that the more likely likelihood there is that an almost ineffably exact play can be published. It is hoped, therefore, that all who are writing books will submit a copy, whether entirely new or not. Accompanying the book there must be a synopsis of the play, the whole of which must be printed in type and presented to the committee in charge of your college. It is earnestly hoped by the dinner committee that each and every Senator will be there thoroughly charged with class spirit.

W. B. SNOW TO SPEAK.

Thursday's Talk of Interest to All Technology Men.

The usual Thursday noon talk proved very interesting to the buildings this week by Mr. Walter W. Snow, M. E., who is at present chairman of the "Making Tech Spirit Count." Mr. Snow, while here, was a member of the Commercial Engineering Corr. and is now a Professor of Engineering at 357 Summer street. He is a term member of the Corporation and is a member of the Committee on the Society of Arts, and of the Department of Mechanical Engineering. He has done much for the T. C. A., and is chairman of the Advisory Board of that organization.

TECH MAN CLIMBER.

It may not be generally known that Joseph M. Linneman, '15, has twice climbed the peak of Mt. Rainier this season. He went first with the Okanogan dawn party and second a party and made the ascent of Mt. Rainier. A notable feature was that no ropes were ever used in the ascent. After returning to Okanogon he remained there for a while and again took the peak of the mountain another party. The ascent was reached this time in about 10 hours and on the way up he took the peak of the mountain in 5 hours.

WILSON CLUB PARADES ON SATURDAY EVENING

Applications Due Today—Judges Chosen for Debate With Bull Moosers.

Although a large number of men have entered their intentions of joining the Wilson Woodrow Wilson College Club parade to be held Saturday night, the committee in charge of Technology's delegation felt that many more men who desire to march have not yet come out. It is important that the number of men who will parade make arrangements today. Tickets which entitle the leader to a copy of distinctive Technology regalia to be worn in the parade, including the torch and red and green fire, are fifty cents, the bare cost of material. Those tickets may be obtained from the club's officers or at the Cage.

For the debate between the Wilson Club and the Bull Moose Club of the judges chosen are Professor Clark of Boston University, Professor Pearson and Professor Robinson of the Institute.

The place of the debate and the nature of the affair of the debate will be published in THE TECH in a day or two. The debate has aroused considerable interest about the matter and several of the Faculty are to be present in the audience.

FRESHMAN OUTLOOK.

Football Team Will Be Judged By Game With Newton Today.

The prospects of the Freshman class in the relay race are somewhat in doubt at present. There has been a decided slump in the efforts of some of the men who have been put out for the team. In one or two cases, some fast runners have not entered to show up for practice and for their trials. Yesterday there were few out for practice, and the flag running was entirely neglected. Coach Keanely says that there has been harder work and more practice in flag passing if the Freshmen expect to win out the winners on Field Day. The most promising candidates at present are Dean and Liebow, owing to sickness, Adams, one of the fastest men, is out temporarily, but it is expected that he will get his time and throw the track as fast as he can in the next two weeks. The football team has been having steady indoor practice and a little more work in the relay, which will be tried out at right hand of the track and books passing. Keanely's squad, however, has added new strength to the line, nothing definite can be said as to their strength until after today's game with Newton.

Monday, Harvard inaugurated the first hydropower team, which practices daily at either the Gym or the Cage. It is coming into good form under the direction of A. F. S., Manager of the Cambridge team, and will be ready to take the place of the relay team at the proper time. The weather is much colder at present than it has been for some time and the members of the team have to make a special effort to keep in condition.
