SOPHOMORE GAME.

Second Year Team Will Play Lowell Textile School.

The Sophomores play their last football game before Field Day this afternoon, when they meet the Lowell Textile School eleven at Lowell. The Lowell team has a bunch of heavy men, and this will give the Sophs an excellent chance to see what they can do against a heavy line.

Capts. Scully requests that all men be at the North Station at a quarter to one to take the o’clock train for Lowell. The probable lineup for the game, with the exception of the tackles, will be as follows: End, Howlett and Fletcher; guards, Murphy and Quick; center, Boynton; quarter- backs, Scully; halfbacks, O’Brien and Morse, and Hearst, fullback. All other men who are out for the team will time probably get on the train.

ARCHITECTS TO MEET.

Vice-President to Be Elected—Sophomores Admit Nov. 4.

On November 4, the Architectural Society will start its season with a meeting in the lecture hall in Pierce Building. This meeting is an important one, because at that time the office of Vice-President will be filled. The Sophomore architects will be admitted to the club at this meeting, and from their number will be elected a member of the club’s Executive Committee.

This meeting is an important one, because the club will consider plans for succeeding seasons. Also, at this time, plans for the season will be discussed, and other men who have always been very successful, will be explained and discussed, as well as other immediate business.

WIRELESS MEETING.

All Men Interested Are Invited to Attend.

At 8 o’clock this evening the New England Wireless Society will hold its first meeting of the year in 21 Walker Building, and all men in any way interested in this subject are invited to attend. The membership of the New England Wireless Society is open to all men who are in any way connected with wireless telegraphy, including members of the M. I. T. Society and those of other Massachusetts colleges.

Among the prominent men who will attend are Mr. N. Mathewson and Richard M. Eastman, the president of the society, who will give the address of the club; and the various details of the organization will be explained.

FIELD DAY EDITORIAL

PUBLISHED ON PAGE TWO

One of Best Submitted for Contest—Subject for Optional.

The first of the editorials written by the competitors for the prize of a series of editorials that are to be submitted, two each week for a period of six weeks, is printed today on the second page. This editorial was selected from among those that were submitted, but it does not necessarily imply that it was the best, as none entered in the contest.

The subject for the editorial that is due on Tuesday is optional, the choosing to be wholly with the contestants. No restrictions are placed upon the field from which the subject shall be chosen. Following are the rules of the contest as formulated by the committee:

1. All editorials must have the same, class and address of its writer on each page.

2. Each editorial must be addressed to M. I. T. Pld Delta Epsilon Contest Committee and left at the Cage or in the upper TECH office by 5 o’clock of the day on which it is due.

3. Each contestant must have written on at least one of his papers a statement of the subject to qualify, and more credit will be allowed the contestant who writes on all subjects.

4. Contestants shall use their own judgment as to style and way of handling each subject, but shall refer to the editorial columns of THE TECH for the proper length.

5. Two subjects will be given out weekly during the first period of the contest, the first of which will be due on Tuesdays, and the second on Fridays. The subject for the editorial due on Tuesday will be published Saturday, and the second on Wednesday.

6. The information upon which editorials are based may be obtained from any source.

7. The manuscript of the editorials must be neat and present a good appearance.

URANIUM PRODUCTION.

United States Prominent in Mining of This Element.

There is considerable popular interest in uranium in the United States on account of its connection with radioactivity, the properties of which appear so marvelous when compared with those of more familiar materials. But very little uranium is mined in this country except as it is incidentally taken out in small quantities for radium. According to the United States Geological Survey, in 1911, only 21.2 tons were mined in the United States.

CADO SHIRTS

We are prepared to give Prompt and Efficient Service in our Custom Shirt Department; Fit and Quality Guaranteed.

Shirts made of D. & J. Anderson Fanny Oxfords, at each...

$3.50

Shirts made of Heavy Cashmeres at each.......
