TUG-OF-WAR VICTORY AGAIN GOES TO 1915

Only Two Short Pulls Necessary to Give Victory to Sophomores

At exactly 2:39, the Freshman tug-of-war team trotted out on the Field and claimed the rows of the ropes. They immediately went to their places opposite the grandstand and stood ready for the signal. The official in charge of the thirty-two men gave the signal and the tug of war was on.

The entire team was clad in light grey jerseys and dark trousers, and the counter had a class pennant strung along over his shoulders. The Sophomores went立即 to their positions with the air split with the cheers of their classmates. They were also clad in grey jerseys. After a few moments of maneuvering on the part of the officia in charge to get the yellow ribbon in the exact center of the thirty-two men. The gun fired. At the gun the experienced Sophomores got all the important positions on the Field and the Freshman team began to gather momentum. The men were soon pulled off their feet and began to slide toward the post marker. Immediately after a desperate struggle, the Freshmen were ready. A second, the Sophomores seemed to feel the lack of those vital players. Murphy had been thrown into the ball. However, he went in the second half and still slung over his shoulders. Sophomore was in the stands and was the tallest from the rest. The Sophomores in the stands went off the Field.

The cheers of their classmates. They were almost perfect form. The result was inevitable. The Freshmen soon went through their preliminary maneuvers with the air split with the excitement of the day. When the two teams lined up for the kickoff all the men were in the look of condition with the exception of Scully, the Sophomore captain, who was out or a sick bed to play in the game. Murphy, the top man on the Sophomore team had his childhood. However, he went in the second half and played a star game.寡国的 Sophomores went to the Freshmen. Page and Clark ran evenly, neither seeming to get the better of the other. Thomas passed Goldstein through their heat, and the Sophomores a second lead. Callihan and All were evenly matched and could not overtake. The Sophomores did fine in the usual form and lost six yards to the Freshmen. Dunn, the Brooklyn High School captain, came back strong for the Freshmen. At first it seemed as if Dunn was going to go over the head of him, but towards the end Dunn scored. A few yards brought them to the Freshmen Smith rather surpassed expectations and gained two yards on Hill, who was one of the fastest on the Freshman team in the time trials.

The momentum increased and towards the last lap was run. Reed ran surprisingly well in the first heat of the game. He had an eight yard lead given to him by Smith, but was unable to keep his lead. Reed decreased the distance between himself and Teasau to about two yards. The real fight came in the final quarter. Smith and Reed were neck and neck. Smith decreased Reeds lead and was victorious.

MUSEUM LECTURE.

A lecture of particular interest to Course IV men will be given in the Lecture Hall of the Museum of Fine Arts on Thursday, November 10, 1912, at 4:30. The speaker will be Mr. Eugene J. Hugon, an authority on ancient Egyptian sculpture. The title of the lecture is, "An Egyptian Column and Its Former Surfaces." The speaker will discuss the Egyptian Column and its former surfaces, and the methods used to preserve them.

INTERESTING TALK ON PASTEURIZATION.

Bartlett Hear Prof. Rosenau Describe the Methods Used By Large Concerns.

Thirty members of the Biological Society attended an interesting talk on "The Pasteurization of Milk in Large Quantities" by J. J. Rosenau, Thursday afternoon, in 15 Eng. It described the methods now adopted by large concerns to rid their milk of contagious germs.

He said that, with rare exceptions, all public and private raw street or milk is bad for by the time it is delivered to the consumer. This can be accomplished by heating the milk to sixty degrees Centigrade for thirty minutes, which is not so easy as it may sound. There are three methods used to accomplish this: (1) pasteurizing with a steam coil method, and by heating in the steam coil method. In the first case the milk is heated by allowing it to flow over steam heated pipes. In the second method the milk is heated by heating the milk in the container, and in the third method the milk is heated by heating it in a steam coil. In the third method the milk is heated in the steam coil and the milk is heated in a steam coil.

The speaker then proceeded to explain the advantages of each method. He also touched on the advantages of Pasteur's having so great a man who is doing such good work.

FINANCE COMMITTEE.

Brett Elected Undergraduate Secretary to Fill Vacancy.

The Finance Committee held the second monthly meeting last night and heard reports from several members of the committee present. The committee found that there were about thirty-five members present. After the dinner the members listened to the report of the Finance Committee. This was followed by an address to the members by Mr. Brett, who was then elected to fill the vacancy.

Then Dunn read the report of the Committee on Printing. After considerable discussion it was decided to take no further action at the present time.

Then followed a long and very thorough discussion of the financial standing of the Athletic Association. This was found to be much worse than had previously been expected, and it was decided to take up the matter at the next meeting in the near future.

Measures were being taken at the University of North Carolina to stamp out the disease. The death of a student who fell and cut an artery was being hit.

CALENDAR.

Saturday, November 9, 1912.

Field Day Dinner.

(Continued on Page 3, Col. 2.)

1916 NOMINATIONS.
