THE TECH, BOSTON, MASS., NOVEMBER 15, 1912

THE TECH will hold a Tea Party for the benefit of all student activities.

CROSS-COUNTRY TEAM NOT TO RUN SATURDAY

Men Will Not Take Part in Inter-Collegiate Race at Ithaca.

The members of the cross-country team will not go to Ithaca for the 1,000,- 000,000 race to be held there last Saturday. This decision was reached yesterday and was brought about by two conditions. The first condition is not in a good financial condition, owing to the fact that they did not receive much money from THE TECH last year. If the squad made the trip to Ithaca it would necessitate the borrowing of a large sum of money. Dr. Rockwell, chairman of the Advisory Council, feels that this expense should not be incurred unless the team could make a good showing against the other colleges.

Before the race, Saturday, Dr. Rockwell told the men that the trip to Ithaca would depend upon the showing made in the race. From the fact that the team finished last and was beaten by Brown, it was thought that they couldn't expect better than sixth place in the big race, and this would not warrant the expense of the trip.

CROSS-COUNTRY.

(Continued from Page 1.)

The Brown squad was well separated. The finishing of these five men (Harmon, Marceau and Gibson, 1913; Harmon, Marceau and Brown, 1912) were the leading places all the Institute Committee and a strong but still a contending factor although not as strong as the other teams.

The team summary was as follows: Dartmouth, first, 171 points; Harvard, second, 176 points; Brown, third, 183 points; Princeton, fourth, 191 points; Amherst, fifth, 200 points.

Men trying for positions on the paper, to the student body for their needs, and the student body was well-judged behind the governing board for all student activities, and if the governing board, which is rightfully the governing board, and which is the most representative body that goes into the paper, and business board.

We therefore ask for the support of men who are willing to give a small amount of their time to the paper, to the student body for their needs, and the governing board, which is rightfully the governing board, and which is the most representative body that goes into the paper, and business board.

We feel that now THE TECH has become a business board in carrying out our functions and first purpose, namely, that of the student body, student life, and with its student activities, and to aid in whatever way we can the progress of the student body.

We feel that now THE TECH has become a business board in carrying out our functions and first purpose, namely, that of the student body, student life, and with its student activities, and to aid in whatever way we can the progress of the student body.
