MEETING OF MINING ENGINEERS TONIGHT
Taggart and Howard to Speak On Opportunities in South America.

The Mining Engineering Society will hold a meeting in the Union at 8 o'clock. The meeting is to open an open competition for the South American opportunity, which will be followed by a dance. The New York Mining Institute will be asked to speak on South America, because they have traveled extensively in that country. The talk will certainly be a most interesting one, not only for the members of the course, for whom it is primarily intended, but also to students outside of the course. These men are up-to-date engineers.

JUNIOR CLASS PIPES.
Saturday Last Day Orders Can Be Received by Committee.

The 1914 Pipe Committee announces that the Junior Class is the last day that they can take orders for class pipes. The committee believes that they have obtained the best pipe in the city, and they have spent much time investigating the pipes of all the prominent pipe merchants in the city and only decided after a most careful consideration. There are six styles that will suit any fancy; all are heat pipes, short and long pulleys, small and large. The pipe is of the best material, as held by the official. The official method "F" and class numerals will be placed in all the pipes, as will be the price. These two pipes are required to pay $1.50 as a deposit and to pay the rest when they receive the pipe. Several orders have been taken already, and men wishing pipes should come over the morning of the pipe committee: A. H. DuBois, H. M. Parker, and A. H. Want.

MEETING OF ELECTRICAL ENGINEERS TONIGHT
I. C. A. A. A. RUN NEXT SATURDAY
Harvard, Cornell, Dartmouth and Brown Look to Have Best Chances to Win.

The meeting of the Electrical Engineers will be held in the Union at 8 o'clock. The meeting is to open an open competition for the South American opportunity, which will be followed by a dance. The New York Mining Institute will be asked to speak on South America, because they have traveled extensively in that country. The talk will certainly be a most interesting one, not only for the members of the course, for whom it is primarily intended, but also to students outside of the course. These men are up-to-date engineers.
