THAT ARE DIFFERENT
FOR SALE AT THE UNION
NEW CONTINUALLY.

AN APOLOGY.

THE TECH desires to express its apologies to Miss Madelaine and the Domestic Science Club for the unfortunate way in which our column yesterday was printed. It was our intention to refer to the desire of Miss Madelaine to have certain points covered in the column. We are glad to be able to write that Miss Madelaine is in complete understanding with the matter as stated.

MRS. RICHARDS HONORED.
Women of Country Will Celebrate Home Economics Day.

In honor of the late Mrs. Ellen H. Richards, for twenty-five years President of the Domestic Chemistry at the Institute, the women of the country will receive her memory on December 7 by celebrating a Home Economics Day. She was probably one of the important women active in social and economic circles.

An effort will be made to complete the raising of the $100,000 fund to her memory on that day or to have it wholly subscribed by January 1. This fund will be used further the work she began during her lifetime. On Home Economics Day women's clubs, colleges and schools will recall her achievements by special programs. It was Mrs. Richards who developed the domestic science platform with great success. Since her death, in March, 1911, this movement has gained strength, and still it advances the idea that it has not gained its full growth.

At a spread of 150 revolutions per minute the turbine engine will pump thirty million gallons of water every twenty-four hours, raising the water from the river level to the city reservoir, located on Crescent Hill. Both the old pumps working together could not pump more than twenty million gallons in the same length of time.

A DOLLAR GOES TO THE MAN WITH THE HIGHEST CANDLE PIN SCORE EACH DAY.

DON'T BE SO LAZY!
