SHIMAN CORRECTED
Balloons Appear

To add to the Institute Committee on A. A.

Shimanski, corrected ballots were placed at the Cage on Monday, which are now available to all Freshmen who wish to check their marks. The correct ballots show the number of marks made by J. P. O. P. Land in his entire career on "American

History in China," in the series he is giving. The Land Institute, founded by the Institute, was the most important of all the American institutions for the study of Chinese culture and history. The Institute was founded in 1910 and is still active.

The purpose of the ballots is to ensure that students are aware of the importance of the Land Institute and its work. The correct ballots include a list of the students who have taken the course and their marks. The students who have not taken the course are marked as "not taken." Each student is also asked to sign the ballot to indicate that they have checked their marks.

The ballots are available at the Cage on Monday and Tuesday. Students are encouraged to check their marks as soon as possible. The correct ballots are also available on the Institute website.

The ballots are intended to improve the accuracy of the Land Institute's records and to ensure that students are aware of the importance of the Land Institute's work. The ballots are also intended to encourage students to take the course and to check their marks.

The Institute is committed to ensuring that all students have the opportunity to learn about the Land Institute and its work. The Institute thanks all students for their support.

The Institute looks forward to seeing all students on campus on Monday and Tuesday to check their marks.
