Chemical Engineering is offering this year an interesting list of provisional subjects to do, even before he leaves the In-
class. These subjects are an indication of the kind of work that the
students specializing in Analytical Chemistry
are as follows: A study of the tetra-
peroxide, the separation and determina-
tion of oleic acid, the determination
of reaction between a liquid and
solids, applying absorption laws to
wetted soils, the flow of non-
condensation, and electric
factors. The subjects offered to men who are
interested in the new subway.
losophy, and twenty-six for the degree
of the members of the so-
ning for the degree of Fellows,

ambition.
Many of our aspirations turn to bitterness in the moment of their realization.

But, up or down the ladder, Velvet is a constant delight—always tenaciously rich—ever smooth and satisfying.
