I you are sore clean throughl. You and baseball. The Freshman class organize a team. An effort will be made to have the support of the faculty. The team will be organized under the direction of W. J. B. and Chas. C. and H. H. H. High school. Now you have read the article and are sore clean throughl. You fear your head and you will never read another article like this again. All I say is, "WAS IST LOS?"

**BIOLOGICAL SOCIETY TRIP GREAT SUCCESS**

Enjoy Hospitality of Russer Brothers — Dr. Floyd Gives Talk.

As guests of the Russer Brothers, proprietors of the Highland Spring brewery, the Biological Society enjoyed one of the most pleasant evenings of their career. The number of men present was not so large as was hoped for, although about one hundred seemed to be the limit of capacity of the Russer Brothers. The ob- servations were made for practice. The faculty members of the society knew where their destination was. The entire trip was arranged entirely by the student heads of the Biological Society and was carried out almost entirely by them.

Upon entering the brewery, which was the starting point of the tour, the Student Society of Bakers, N. H. S. P. B. L. and the Staff of The Tech were met and conducted through the various offices and given a good while of the business transacted. After leaving the office of W. J. B. and the Student Society of Bakers, the Society in charge and conducted them through the brewery proper. The student is the main feature of the tour, which is called the "WAS IST LOS" business, and heartily.

The first step in the manufacture of the ale is the malting process, which is accomplished at the hatch, and consists in allowing wheat to germinate or sprout water at a temperature of 155 degrees Fahrenheit. This malt is then dried and stored in the warehouse. After the malt is thoroughly dried, the liquid is added in the form of a thick paste. The temperature is lowered to about 60 degrees Fahrenheit, and after about seven days a scum rises to the top of the vat. The ale is then distilled, and the residue is added to the next vat. This process is repeated until the desired strength of the ale is obtained. The ale is then pressed through copper pipes to a large condenser, where the temperature is lowered to about 60 degrees Fahrenheit. At this point the yeast is added in the form of a solution. It might be interesting to note that the Russer Brothers have used the same yeast and over for at least twenty years.

It might be interesting to note that the Russer Brothers have used the same yeast and over for at least twenty years.

**WRESTLING TEAM TO GO EAST WEYMOUTH**

Almost a Certain Win for Tech

The first wrestling meet of this season will be held in East Weymouth tomorrow, when the Tech team meets the Chap Memorial Gym team. All the men are in fine condition and have been working hard. It is almost certain that Tech will win all the bouts. Last year, H. W. Treat was the winner in an open meet.

A. Hodgetts, J. G. Kelly are entered in the 135-lb. class; H. L. Phelan, H. F. Jones, in the 145, H. W. Treat and F. P. Alexander in the 155. H. W. Means, in the 125-lb. class, will be unable to win the team because of the doctor's orders, and H. P. H. in the 165-lb. class, because there is no one to oppose him. Dr. W. F. Provost, N. K. Worleight, an instructor at the Harvard Dental School, will referee.

Almost a Certain Win for Tech

All Freshmen out for the wrestling team have been requested to be at this meet at East Weymouth to get some experience by watching the wrestlers. The men will leave the South Station at 6:30 P.M. tomorrow.

**PORTFOLIO NOM**

Senior Pictures to Be Taken at Notman's Next Monday.

At a meeting of the officers of the Senior Class, held yesterday afternoon, it was decided to have the class pictures taken at Notman's on Monday, December 19th, 1912. The President will also appoint a committee to take charge of the Senior Portfolio Committee nominations.

Nominations for members of the Portfolio Committee will be left at the Cage for the 1913 Nominations Committee. Nominations must be signed by at least ten members of the Senior Class and must be in before 4 P.M., Friday, December 20th.

President Wheeler of the University of California believes that, compared with the ordinary marriages made in love, the marriages made in college are a great improvement.

**THE WEATHER**
