CO-OPERATION DINNER OF THE TECH STAFF

Meeting Takes Place Tomorrow.

All Men Out for the Paper.

Are Guests.

At promptly 6 o'clock tomorrow evening the Managing Board of THE TECH will act as hosts at a dinner given for the news and business departments of the paper. The affair will take place in the smaller dining room of the Union, with Mr. Colton as caterer.

A feature of this meeting will be the presentation of the Annual Award of THE TECH. This body of three men, which is closely connected with the doings of THE TECH, has been asked to notice the inter-relation of its various departments. The members of the council are expected to have many valuable interesting comments and suggestions to make.

This dinner will be an informal one, much like the one connected with THE TECH.

The prevailing spirit will be of the get-together kind, where the students and the members of the other branches of the activity, said to be the most important of any kind in the Institute, can become acquainted with each other and the other members of the faculty. The knowledge and perspective of the various branches of the machin-ery of THE TECH is a distinct help to the individual, and for that reason, in addition to the men who have already won positions on the staff, every promising candidate has been invited and expected to present.

Some novel features will be introduced at this meeting.

ENGINEERING LECTURE.

M. E. Society Invited to Lecture by Prof. H. W. Hayward.

There will be a meeting of the American Association of Mechanical Engineers on Friday evening, December 11th, with Mr. L. E. F. Miller, President, who is to be in the Edson building, at 29 Goyerton street.

Mr. Miller is professor of Mechanical Engineering at the Institute, and he will speak on "The Testing Laboratory and Constructing Engineer." He will describe various kinds of engineering laboratories and cut out the possibilities of service to manufacturers and constructors.

A number of unique slides will be shown in connection with various ex-periences which will be related. Illustrat- ing lectures and inconsistencies of engineering specifications.

This talk is intended to prove a thorough knowledge of the topic from every angle within the general discussion which is to follow. All interested are invited to attend, whether members of the society or not.

HARVARD MATCH OFF.

The wrestling match between Tech and Harvard has been canceled, as the managers cannot agree on a date. It lay between tonight and Wednesday night. Tech could not consent to play the mat on Harvard's ground. It impracticable to have it Wednesday night, owing to the Harvard hockey game.

POSTER COMPETITION BEGINS WEDNESDAY.

Publicity Manager G. E. Whi-twell will Meet Competitors in Show Office.

On account of the fact that the music competition began yesterday, the poster competition for Tech Show, 1912, has been postponed until Wednesday, December 17th, at 6 P. M. At this time Publicity Manager G. E. Whitwell will be in the Show office to meet all those men who are interested in trying poster work.

It is hoped that this branch of the Show will not be left to the Architectural Department alone, for there has been no management with any man in the society or not, or the whole of the town, regardless of his course at the Institute, to come out. The competition will run until after "mid-year" thus allowing the men to show off the work in time to advertise and execute their ideas. As has been all men connected with the custom to run for the winter poster.

The contest is to be held in two flat color and black, the colors to be chosen by the artist. The drawing is to be twenty by forty inches and must show the plot of the Tech Show and the title "Money in Motion," with a blank space left at the bottom for the insertion of the date and place of performance. The idea embodied in the show should suggest the costume. The Show only, further acquaintance with the plot of the play is unnecessary.

Of the posters for the past thirteen shows, the first seven were drawn by professionals, while the last six were done by students, and at the present time every single entry is made by students. This year the Show is done by students with the single exception of the professional coaching, so that it would seem incon- ceivable that it was necessary to call upon outside talent for this year's work.

The management hopes that every man who has, or thinks he has, the ability in this line, will come out and make a trial. At any rate, men who have already shown what they can do, have a chance of showing again, and should come around next Wednesday after the show. It will be shown what is to be said on the subject.

PROF. HALE TO SPEAK.

Tech Man Will Give Lecture on the Magnetism of Sun.

This afternoon, at 4 o'clock, Professor George E. Hale will give a talk on "The Magnetic Field of the Sun." Professor Hale is a Tech man, having graduated from the Institute with the class of 1890. He has spent considerable time studying the magnetism of the sun, and his lecture will relate primarily to his own work in de-termining the exact magnetic field of that planet. The talk will be of extreme interest, and everyone to whom anything of this nature appeals is cordially invited.

The lecture will be held in Room 23, Walker.

Some class to our wrestling team.

Wednesday is hockey night and Thursday.

MECHANICAL ENG. SOC. HAS GROWN GREATLY.

Course II Society Has Varied History—Membership Now About One Hundred.

This is the second of a series of articles on the various Course Societies which will be run in THE TECH. The first was on the Civil Engineering Society. Course 3, and appeared in the issue of December 10th. The Mechanical Engineering Society's was out- lined the possibilities of service to the building and constructing engineer. "-le will describe various engineering specifications.

It promises to be a very interesting one.

E. E. SOCIETY TRIP COMES MID-YEAR'S WEEK.

Itinerary is Arranged to Include Principal Electric Plants of New York.

Tonight the completed plans and experiences of the proposed E. E. So-ciety trip will be told before the meeting for adoption. The trip is to include a two days' stay at Niagara Falls and Buffalo for the mid-year's week, and two more days in New York City. A few members who cannot make the trip may not be able to attend the meeting, for the trip is limited to 30 individuals.

Several complete itineraries covering in detail the six days' trip have been printed. All accommodations will be provided for in advance, and the members of the society have been given an opportunity to make their own arrangements if they wish.

The trip will be open to all students of the Institute. Complete details will be given tonight by Mr. J. A. Tennant, chairman of the Executive Com-mittee, at the society's dinner in the Union at 6:30 P. M.

The Society will leave by train at 10 o'clock Monday, December 14th, and will arrive at Niagara Falls about 4:00 P. M. The E. E. Society's trip will be laid before the Union Council on Monday night of the 11th, at which time the Faculty has already signified his intention of going.

On account of the number of the members, the trip will be open to all students of the Institute. Complete details will be given tonight by Mr. J. A. Tennant, chairman of the Executive Committee, at the society's dinner in the Union at 6:30 P. M.
