PROF. HAYWARD TO SPEAK TONIGHT
Relation of Testing Laboratory to Manufacturing Engineer Explained.

This evening at 8 o'clock Prof. Har- 

rison W. Hayward will speak before the American Society of Mechanical Engineers in the Edison Building at 29 Boylston street. His talk is to be on "The Testing Laboratory and the Constructing Engineer," and all men interested in this subject, whether members of the society or not, are cordially invited to attend.

Prof. Hayward is Professor of Theoretical and Applied Mechanics at the Institute, and is very well liked by the men who have come into contact with him, especially those in Course II. He is also a very interesting speaker.

His address this evening will describe various laboratories and outline the way in which they are service to the firms maintaining these laboratories. He will show the practical value of the testing laboratory to the engineers connected with the firms. Prof. Hayward will describe some of his experiences personally engaged in engineering specifications which come under Mechanic, and illustrate them with lantern slides. By means he hopes to bring out similar experiences and remarks from the past present during the usual informal discussion which will follow his address.

All Course II, men who attend the meeting will undoubtedly spend a very pleasant evening.

CLASS HISTORIES.
December 30 Last Date to Sub- 

mit Them to Technique, 1914.

All class histories for the 1914 Technique must be in not later than the night before they are to be printed in the section. Several histories have been submitted so far, but there is a very good opportunity to write an acceptable story. There is no limit to the number of words to cover the three or four printed pages in the usual format, and the men who manage to get the best. These histories can be handed in either to the Technique office, and the men in charge wish it to be emphasized that December 30th is positively the final date.

MUSEUM OF FINE ARTS.
Next Sunday afternoon, December 22, two free lectures will be given at the Museum of Fine Arts, which will be open to men of the Tech school, and Tech men who are in the city on that date. At 3.30 P. M. Mr. Vesper L. George will speak on "The Adjudication of Design to Material" in the Western Art Department, and Mr. Louis S. Kershaw will lecture visitors to the Egyptian Department and the Ancient Authentic Art in the Forecourt Room. Both may be interesting in those objects invited to attend.

HOCKEY PRACTICE.
All the members of the Varsity hockey team are expected to report for practice tonight at the Arenas, at 7.45 sharp.

WEATHER.
Forecast for Boston and vicinity: Friday fair; brisk to high westerly winds.

CALENDAR.
Friday, December 30, 1912
