Phone—Back Bay 5327 or 3267.

Subscriptions within the Boston Postal District and within the United States $3.00 per annum. Subscriptions to be paid annually in advance.

FRIDAY, JANUARY 3, 1913

K E E P T O T H E R I G H T.

It was 1636 by the clock one morning last week when some fellows, who evidently had a 10 o'clock class "way up in Rogers," came tearing up the stairs. The upper-classmen in Rogers Halls, and without stepping to see what was going on, made a dive for the left-hand side of the swinging doors at the entrance. As a result, the first person who emerged was a man who was coming out with less velocity, but with such force that he sustained a blow which would be far from pleasant to an experienced "human wedge" of the gridiron. In the winter season these swinging doors move more or less rapidly, and the doors are more or less bound rigidly in transit, and such an accident would have been entirely avoided if the man in question had not been a little more courteous and considerate of others and had obeyed the universal rule of "keep to the right."

When we are hurried between classes it is perhaps natural that our unconscious thought and effort should be to "get there," but we should be mindful of the convenience and safety of others. A person does not have to be at the Institute long before he notices the congestion often occurring on some of the narrow stairways during "rush hours." This is often very annoying and may even be entirely avoided if everyone will be careful to keep to the right and avoid unnecessary jostling and pushing. Again, in the case of passing between the first and second floors in Heerman Building, where two stairways are provided, it would not be safe if we always use the right-hand stairway which is safer.

CHEMICAL SOCIETY.

Today's Meeting to Be Postponed Until Next Week.

The business meeting of the Chemical Society, which was to come at 8 o'clock, was had to be postponed until next week, owing to the inability of many of the members to attend the meeting today. The program committe had already completed the arrangements for a speech by the early part of next month, and it is probable that this meeting will be postponed because it was to be discussed today will be presented to the members at a short session before the lecture.

FIRST RELAY TEAM TRIALS SATURDAY.

Indoor Handicap Meet Will Also Be Held Thursday—Open Class Meet Next Week.

The first time trials for the 200 yard relay team will be held Saturday afternoon. All men expecting to take a trial and requested to take it on this list. It is required that all men entering these trials should enter no event other than the thirty-yard dash in the heat to be held Saturday.

This meet on Saturday will be similar to those held during the fall season, and the one held a few weeks ago. The entry books are now open for this meet, which will be held in the gymnasium, and it is desired that many of the old men also run. The meet will be a handicap race, thus giving the slower man a good chance.

On Friday, January 10, in the Gym, will be held the annual open indoor class meet. Numbers will be awarded to point winners in this meet, in which there is always much rivalry between the classes.

THE AMERICAN BRASS COMPANY

ANSONIA BRASS & COPPER BRANCH

Ansonia, Connecticut
