PROPOSED CONSTITUTION

(Continued from Page 2.)

The officers of the Institute Committee shall consist of a President, Vice-President and Secretary-Treasurer, who, with the members elected from the Committee-at-Large, shall constitute an Executive Committee.

Section 2. The President of the Society shall be President of the Institute Committee. All other officers of the Committee shall be chosen annually by the Committee at the Annual Meeting.

Section 3. The Institute Committee shall consist of such members as may be deemed necessary, and not inconsistent with the provisions of this Constitution.

(Continued on Page 5.)

MANY PROMINENT MEN WILL ATTEND DINNER

Tech Graduates from All Parts of Country to Meet at New York.

More than fifty Boston men have already registered for the Big New York dinner of the Alumni of Technological Institute. Arrangements are being made to have dinner over the United States will be there forever will be registered, as known at this time, by H. O. Hotchkiss, '90, the manager of the Mill and Smelter Supply Company of that district. From Minneapolis comes David Van Ely, '96, the South will be represented, mining others, by R. G. Gates, '95, vice-president of the Eastern Kentucky Railway, of Richmond, Kentucky. Over a half dozen men from Ohio, and as many from west New York, have promised to present. A large delegation from New Jersey is likewise expected.

Colman DuPont, '94, the powder magnate, will be in evidence at the festivities. Captain David A. Leslie, '94, U. S. A., the inventor of the Yale gun, will head a delegation from Philadelphia, which will doubtless include the half dozen Tech men who have been called by the mayor to remake the municipal departments.

Describing the delegation of health officers who always come to greet their old school. Professor Draper, there will be a good number of men in other lines of business, including Whitney, Crout, a man who never finds that there is room at the table.

CATHOLIC CLUB.

(Continued from Page 3.)

THANK YOU, H. C.

Heckel's theory of evolution to another point, that of the animal and his social instinct, as presented by the man who never finds that there is room at the table.

The theory of Darwin, as opposed to that of consistency, in which all existing species at the present time, and that they undergo no change, was accepted by Heckel, known as the Prophet of Jesus, and who was a very cultured man, and who as a scientist and given much to science. He believed in natural selection and in the survival of the fittest. To furnish proof of the theory that all species originated from one, he wrote a book, in which he sets forth his view. He added evidence the fact that the protoplasm of the dog, the turtle, and of the chicken is the same, and to support this he gives several illustrations. The view was not accepted by the apparent proof, but one man discovers that the photographs used were but different views of the same protoplasm, and that Heckel had deceived the world. This scientist said that he did not know what all other scientific men were doing. Heckel, however, was severely censured and also suffered considerable abuse. In his book Heckel entirely does away with the erroneous and outridicly denies the immortality of the soul. He states that man is only a higher form of animal, and his social instinct, as found among animals, should be the first of a new life. This brings the question of evolution to another point. This matter in which Catholicism regards this theory of Heckel. Rev. Cullet will continue his talk on this subject at the 12th of February. This subject is one of great interest, and anyone interested is invited. The club reserves a still larger number of men in turn out next time.
